Independent auditor's report

To the Council of the International Investment Bank

Opinion

We have audited the separate financial statements of International Investment Bank (the "Bank"), which comprise the separate statement of financial position as at 31 December 2016, and the separate income statement, separate statement of comprehensive income, separate statement of changes in equity and separate statement of cash flows for 2016, and notes to the separate financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying separate financial statements present fairly, in all material respects, the financial position of the Bank as at 31 December 2016 and its financial performance and its cash flows for 2016 in accordance with International Financial Reporting Standards (IFRSs).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the separate financial statements* section of our report. We are independent of the Bank in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the separate financial statements in the Russian Federation, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the separate financial statements of the current period. These matters were addressed in the context of our audit of the separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's responsibilities for the audit of the separate financial statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the separate financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying separate financial statements.

Provisions for impairment of loans to customers

The assessment of provisions for impairment of loans to customers is a key area of judgement for management of the Bank. The identification of impairment and the determination of the recoverable amount are inherently uncertain processes involving significant judgements, various assumptions and factors including the financial standing of borrowers and expected future cash flows. Information on the impairment of loans to customers is included in Note 11, *Loans to customers*, Note 23, *Risk management*, to the separate financial statements. The use of different models and assumptions could produce significantly different estimates of impairment of loans to customers. Due to materiality of the loans to customers represented 31% of the total assets and significant judgements the assessment of provisions for impairment was one of the key audit matters.

Our audit procedures included an evaluation of the methodology of the assessment of provisions, testing of inputs, evaluation of the assumptions used by the Bank in the calculation of the impairment and the assessment of the adequacy of provisions for loans to customers with individual signs of impairment. We analysed expected future cash flows in respect of significant individually impaired loans to customers.

We also assessed whether the disclosures in the separate financial statements about the Bank's provision for impairment of loans to customers are compliant with applicable IFRS requirements.

Valuation of the buildings classified to "property and equipment" and "investment property"

The Bank's aggregate value of the buildings classified to "property and equipment" and "investment property" was 10% of the total Bank's assets. Bank's management measured the value the buildings classified to "property and equipment" and "investment property" with involvement of the independent appraiser.

The valuation of the assets utilises unobservable inputs and assumptions. Changes of these inputs and assumptions may have a significant impact on the valuation. The significance and subjectivity of these valuations make them a key audit matter. Information of the valuation of the buildings classified to "property and equipment" and "investment property" is included in Note 12, *Investment property*, Note 13, *Property, equipment and intangible assets*, and Note 24, *Fair value measurements*, to the separate financial statements.

Our audit procedures in respect of the buildings classified to "property and equipment" and "investment property" included evaluation of competence and objectivity of the Bank's independent appraiser involved, examination of the significant assumptions applied and comparison of inputs used to available market prices and other observable information. We involved our real estate valuation specialists to evaluate the methodology and assumptions used. We also assessed whether the Bank's disclosures in relation to the valuation of the buildings classified to "property and equipment" and "investment property", in particular, the sensitivity of fair value to changes to key assumptions, are compliant with applicable IFRS requirements.

Other information included in the Bank's Annual Report for 2016

Other information consists of the information included in the Annual Report of International Investment Bank for 2016 other than the separate financial statements and our auditor's report thereon. Management is responsible for the other information. The Annual Report of International Investment Bank for 2016 is expected to be made available to us after the date of this auditor's report.

Our opinion on the separate financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the separate financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the separate financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

Responsibilities of management and Council of the International Investment Bank for the separate financial statements

Management is responsible for the preparation and fair presentation of the separate financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the separate financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Council of the International Investment Bank are responsible for overseeing the Bank's financial reporting process.

Auditor's responsibilities for the audit of the separate financial statements

Our objectives are to obtain reasonable assurance about whether the separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

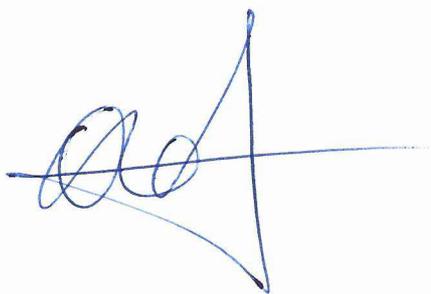

- ▶ Identify and assess the risks of material misstatement of the separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- ▶ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- ▶ Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- ▶ Evaluate the overall presentation, structure and content of the separate financial statements, including the disclosures, and whether the separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with Council of the International Investment Bank regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide Council of the International Investment Bank with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with Council of the International Investment Bank, we determine those matters that were of most significance in the audit of the separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The partner in charge of the audit resulting in this independent auditor's report is O.V. Youshenkov.

(Thousands of euros)

1. Principal activities

The International Investment Bank (hereinafter, the “Bank”) was founded in 1970 and has operated since 1 January 1971.

The Bank is an international institution operating on the basis of the Intergovernmental Agreement on the Establishment of the International Investment Bank (the “Agreement”) and the Statutes. The Agreement was ratified by the member countries of the Bank and registered with the Secretariat of the United Nations in December 1971. The Bank is primarily engaged in commercial lending for the benefit of national investment projects in the member countries of the Bank and for other purposes defined by the Council of the Bank. The Bank also performs transactions with securities and foreign currency. The Bank operates from its office at 7 Mashki Poryvaevoi St., Moscow, Russia, and the European regional office in Bratislava (Eurovea Central 1, Pribinova 4, Bratislava, 81109, Slovak Republic).

The Bank had an average of 141 staff employees during 2016 (2015: 148).

On 31 July 2014, the EU Council imposed sectoral sanctions against Russia. The preamble of the Decision of the EU Council of 31 July 2014 (paragraph 9) and Council Regulation (EU) No 833/2014 of 31 July 2014 (paragraph 5), which was developed based on the Decision, emphasize that the sanctions do not cover Russia-based institutions with international status established by intergovernmental agreements in which Russia is one of the parties. Therefore, the International Investment Bank is not subject to the restrictive measures.

The Bank continues to expand its operations despite the ongoing market volatility in member countries:

- ▶ Hungary re-entered the Bank in 2015 and in 2016 made an ahead-of-schedule final contribution to the Bank's equity. As at the end of 2016, Hungary's share in the Bank's paid-in capital was EUR 40 million or 12.78%.
- ▶ As a result of the Hungary's re-entering, the respective share of the EU countries in the Bank's paid-in capital grew up to 48.72% exceeding the share of the Russian Federation, which decreased to 47.92%.
- ▶ The Bank winds up the introduction of changes to its constituent documents and implementation of the three-level corporate governance structure. The Protocol on Introducing Changes to the Agreement on the Establishment of the International Investment Bank and the Statutes (hereinafter, the “Protocol”) signed at the end of 2015 is at the stage of ratification (internal state procedures) by member countries of the Bank. The Protocol will enter into force upon completion of those ratification procedures. As at the end of 2016, the Protocol was ratified by Hungary, Vietnam, Romania, and Russia (4 countries out of 9).
- ▶ In December 2016, Fitch Ratings upgraded the rating of the Bank to BBB with a stable outlook, for the first time since rating in 2013. Also, the Bank is assigned the following investment grade ratings: Baa1 (stable outlook) by Moody's and A (stable outlook) by Dagong Global Credit Rating. In June 2016, the Bank was assigned the BBB rating (stable outlook) by Standard & Poor's.
- ▶ In June 2016, the Bank concluded a cooperation agreement on fund raising with the Central Bank of Cuba. The agreement confirms the special status of the International Investment Bank in Cuba, which implies that the Cuban party shall fulfill its liabilities to the IIB under the projects in Cuba financed by the Bank.
- ▶ The IIB completed a large-scale IT-project to upgrade its core banking system (CBS) – a digital platform to manage, process and protect the Bank's data. A data-processing center was launched in the IIB European Regional Office in Bratislava to ensure security and uninterrupted service of the new CBS.
- ▶ In April 2016 the Bank signed an agreement with the Ministry of Finance of Slovakia concerning the creation of a Technical Assistance Fund, which will be a new instrument supporting the activities of the IIB in country shareholders. The aim of the Fund is to finance the consulting services and technical assistance rendered, for projects in which the IIB is investing in fulfilling its mission. The countries in scope are Mongolia, Vietnam and Cuba. Within this given scope the Bank is undertaking consultation and negotiations with CAF (The Development Bank of Latin America) in order to identify potential projects in which to invest or to finance.

*(Thousands of euros)***1. Principal activities (continued)****Member countries of the Bank**

The member countries of the Bank include (share in the paid-in capital of the Bank, %):

<i>Member countries</i>	<i>2016, %</i>	<i>2015, %</i>
Russian Federation	47.923	49.505
Republic of Bulgaria	13.481	13.926
Hungary	12.777	9.899
Czech Republic	9.703	10.023
Slovak Republic	6.862	7.088
Romania	5.895	6.089
Republic of Cuba	1.713	1.769
Socialist Republic of Vietnam	1.172	1.211
Mongolia	0.474	0.490
	100.000	100.000

Conditions of the Bank's financial and business operations in the member countries

In its member countries, the Bank is not subject to taxation and enjoys all privileges available to diplomatic representations.

The Bank is not subject to regulation by the Central Banks of the member countries, including the country of residence.

Business environment in the member countries

Economic and political development of the Bank's member countries affects the activities of enterprises operating in these countries. Considering this fact, the Bank performs its operations with reference to the regional features of its member countries to ensure overall assessment and control of credit and operational risks.

The accompanying separate financial statements reflect the management's assessment of the impact of the member countries' business environment on the results of operations and financial position of the Bank. Future evolution of the conditions in which the Bank operates may differ from the assessment made by the management for the purposes of these separate financial statements.

2. Basis of preparation**General**

The Bank, as a parent company, prepares consolidated financial statements in accordance with International Financial Reporting Standards ("IFRS") approved by the International Accounting Standards Board. The consolidated financial statements of the IIB Group for the year ended 31 December 2016 were signed and authorized for release on behalf of the Board of the Bank on 15 March 2017.

These financial statements have been prepared on a separate basis in accordance with International Financial Reporting Standards ("IFRS"). The separate financial statements have been prepared to be included in the report on activities of the International Investment Bank for 2016, which is to be submitted for consideration of the Revision Commission and the Bank's Board.

Subsidiary

The Bank is a parent company of the Group, which owns CJSC IIB Capital (a 100% subsidiary established in 2012 for the purpose of the acting of the Bank, in particular, for the property trust of the Bank) as at 31 December 2016.

Investment in subsidiary is measured at cost. The management of the Bank perform the assessment of net assets of the subsidiary on a regular basis and create the allowance if necessary.

(Thousands of euros)

2. Basis of preparation (continued)

Basis of measurement

These separate financial statements have been prepared under the historical cost convention with the exception of the financial instruments under fair value convention, the changes of which are translated through profit or loss account for the period, available-for-sale financial instruments also stated at fair value, and buildings and investment property are stated at revalued amounts.

Preparation and presentation of financial statements

The financial year of the Bank begins on 1 January and ends on 31 December.

Functional and presentation currency

Euro ("EUR") is the Bank's functional and presentation currency as it reflects the economic substance of the underlying operations conducted by the Bank and circumstances affecting its operations, because most financial assets and financial liabilities as well as income and expenses of the Bank are denominated in EUR.

These separate financial statements are presented in thousands of euros ("thousands of euros" or "EUR thousand"), unless otherwise indicated.

3. Summary of accounting policies

Changes in accounting policies

The Bank has adopted the following amended IFRS which are effective for annual periods beginning on 1 January 2016:

Amendments to IAS 1 Disclosure Initiative

The amendments to IAS 1 clarify, rather than significantly change, existing IAS 1 requirements. The amendments clarify:

- ▶ The materiality requirements in IAS 1
- ▶ That specific line items in the statements of profit or loss and OCI and the statement of financial position may be disaggregated
- ▶ That entities have flexibility as to the order in which they present the notes to financial statements
- ▶ That the share of OCI of associates and joint ventures accounted for using the equity method must be presented in aggregate as a single line item, and classified between those items that will or will not be subsequently reclassified to profit or loss

Furthermore, the amendments clarify the requirements that apply when additional subtotals are presented in the statement of financial position and the statements of profit or loss and OCI. These amendments are effective for annual periods beginning on or after 1 January 2016. These amendments do not have any impact on the Bank and presentation of other comprehensive income in separate financial statements of the Bank.

Amendments to IFRS 10, IFRS 12 and IAS 28: Investment Entities: Applying the Consolidation Exception

The amendments address issues that have arisen in applying the investment entities exception under IFRS 10 *Consolidated Financial Statements*. The amendments to IFRS 10 clarify that the exemption from presenting consolidated financial statements applies to a parent entity that is a subsidiary of an investment entity, when the investment entity measures all of its subsidiaries at fair value.

Furthermore, the amendments to IFRS 10 clarify that only a subsidiary of an investment entity that is not an investment entity itself and that provides support services to the investment entity is consolidated. All other subsidiaries of an investment entity are measured at fair value. The amendments to IAS 28 *Investments in Associates and Joint Ventures* allow the investor, when applying the equity method, to retain the fair value measurement applied by the investment entity associate or joint venture to its interests in subsidiaries.

(Thousands of euros)

3. Summary of accounting policies (continued)

Changes in accounting policies (continued)

These amendments must be applied retrospectively and are effective for annual periods beginning on or after 1 January 2016. These amendments do not have any impact on the Bank as the Bank does not apply the consolidation exception.

Annual Improvements 2012-2014 Cycle

These improvements are effective for annual periods beginning on or after 1 January 2016. They include, in particular:

IFRS 5 Non-current Assets Held for Sale and Discontinued Operations

Assets (or disposal groups) are generally disposed of either through sale or distribution to owners. The amendment clarifies that changing from one of these disposal methods to the other would not be considered a new plan of disposal, rather it is a continuation of the original plan. There is, therefore, no interruption of the application of the requirements in IFRS 5. This amendment must be applied prospectively.

IFRS 7 Financial Instruments: Disclosures

The amendment clarifies that a servicing contract that includes a fee can constitute continuing involvement in a financial asset. An entity must assess the nature of the fee and the arrangement against the guidance for continuing involvement in IFRS 7 in order to assess whether the disclosures are required. The assessment of which servicing contracts constitute continuing involvement must be done retrospectively. However, the required disclosures would not need to be provided for any period beginning before the annual period in which the entity first applies the amendments.

Foreign currency transactions

The separate financial statements are presented in euro, which is the Bank's functional and presentation currency. Every currency except euro is considered foreign currency. Transactions in foreign currencies are initially translated in the functional currency, converted at the rate of exchange ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the reporting date. Gains and losses resulting from the translation of foreign currency transactions are recognized in the separate income statement as "Net (losses)/gains from revaluation of assets and liabilities in foreign currencies". Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary assets and liabilities measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Differences between the contractual exchange rate of a transaction in a foreign currency and the Bank's exchange rate on the date of the transaction are included in "Net gains/(losses) from dealing in foreign currencies".

Subsidiaries and associates

Subsidiaries are those entities, in which the Bank has an interest of more than one half of the voting rights or equity interest, or otherwise has power to exercise control over their operations. Associates are entities in which the Bank generally has between 20% and 50% of the voting rights or equity interest, or is otherwise able to exercise significant influence, but which it does not control or jointly control. These separate financial statements of the Bank contain no consolidated interests of the Bank and no investments recognized under the equity method.

Investments in subsidiaries and associates are carried in the separate financial statements at actual acquisition cost. Management regularly measures the recoverable value of such investments and, when necessary, provides for impairment.

Cash and cash equivalents

Cash and cash equivalents include cash on hand and amounts due from banks and other financial institutions, including reverse repurchase agreements, which mature within ninety days from the origination date and are free from contractual encumbrances.

(Thousands of euros)

3. Summary of accounting policies (continued)

Fair value measurement

The Bank measures financial instruments, such as trading and available-for-sale securities, derivatives and non-financial assets such as investment property, at fair value at each reporting date. Also, fair values of financial instruments measured at amortized cost are disclosed in Note 24.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- ▶ In the principal market for the asset or liability; or
- ▶ In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Bank. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Bank uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the separate financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- ▶ Level 1 – quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- ▶ Level 2 – valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- ▶ Level 3 – valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the separate financial statements on a recurring basis, the Bank determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Financial assets

Initial recognition

Financial assets in the scope of IAS 39 are classified as either financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, or available-for-sale financial assets, as appropriate. The Bank determines the classification of its financial assets upon initial recognition, and subsequently can reclassify financial assets in certain cases as described below.

Date of recognition

All regular way purchases and sales of financial assets are recognized on the trade date i.e. the date that the Bank commits to purchase the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace.

Financial assets at fair value through profit or loss

Financial assets classified as held for trading are included in the category “financial assets at fair value through profit or loss”. Financial assets are classified as held for trading if they are acquired for the purpose of selling in the near term. Derivatives are also classified as held for trading unless they are designated and effective hedging instruments. Gains or losses on financial assets held for trading are recognized in profit or loss.

(Thousands of euros)

3. Summary of accounting policies (continued)

Financial assets (continued)

Held-to-maturity investments

Non-derivative financial assets with fixed or determinable payments and fixed maturity are classified as held-to-maturity when the Bank has the positive intention and ability to hold them to maturity. Investments intended to be held for an undefined period are not included in this classification. Held-to-maturity investments are subsequently measured at amortized cost. Gains and losses are recognized in profit or loss when the investments are impaired, as well as through the amortization process.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are not entered into with the intention of immediate or short-term resale and are not classified as trading securities or designated as investment securities available-for-sale. Such assets are carried at amortized cost using the effective interest method. Gains and losses are recognized in profit or loss when the loans and receivables are derecognized or impaired, as well as through the amortization process.

Available-for-sale financial assets

Available-for-sale financial assets are those non-derivative financial assets that are designated as available-for-sale or are not classified in any of the three preceding categories.

After initial recognition available-for-sale financial assets are measured at fair value with gains or losses from change in fair value being recognized in other comprehensive income until the investment is derecognized or until the investment is determined to be impaired at which time the cumulative gain or loss previously reported in other comprehensive income is reclassified to the separate income statement. However, interest calculated using the effective interest method is recognized in profit or loss.

Reclassification of financial assets

If a non-derivative financial asset classified as held for trading is no longer held for the purpose of selling in the near term, it may be reclassified out of the fair value through profit or loss category in one of the following cases:

- ▶ A financial asset that would have met the definition of loans and receivables above may be reclassified to loans and receivables category if the Bank has the intention and ability to hold it for the foreseeable future or until maturity.
- ▶ Other financial assets may be reclassified to available for sale or held to maturity categories only in rare circumstances.

A financial asset classified as available for sale that would have met the definition of loans and receivables may be reclassified to loans and receivables category if the Bank has the intention and ability to hold it for the foreseeable future or until maturity.

Financial assets are reclassified at their fair value on the date of reclassification. Any gain or loss already recognized in profit or loss is not reversed. The fair value of the financial asset on the date of reclassification becomes its new cost or amortized cost, as applicable.

Repurchase and reverse repurchase agreements and securities lending

Sale and repurchase agreements (“repo”) are treated as secured financing transactions. Securities sold under sale and repurchase agreements are retained in the separate statement of financial position and, in case the transferee has the right by contract or custom to sell or repledge them, reclassified as securities pledged under sale and repurchase agreements. The corresponding liability is presented within amounts due to credit institutions or customers. Securities purchased under agreements to resell (“reverse repo”) are recorded as cash equivalents, deposits with banks and other financial institutions as appropriate. The difference between sale and repurchase price is treated as interest and accrued over the life of repo agreements using the effective interest rate method.

Securities lent to counterparties are retained in the separate statement of financial position. Securities borrowed are not recorded in the separate statement of financial position, unless these are sold to third parties, in which case the purchase and sale are recorded within gains less losses from trading securities in the separate income statement. The obligation to return them is recorded at fair value as a trading liability.

(Thousands of euros)

3. Summary of accounting policies (continued)

Derivative financial instruments

In the normal course of business, the Bank enters into various derivative financial instruments including forwards and swaps in the foreign exchange market. Such financial instruments are held for trading and are recorded at fair value. The fair values are estimated based on quoted market prices or pricing models that take into account the current market and contractual prices of the underlying instruments and other factors.

Derivatives are carried as assets when their fair value is positive and as liabilities when it is negative. Gains and losses resulting from these instruments are included in the separate income statement as net gains/(losses) from dealing in foreign currencies and operations with derivatives.

Derivatives embedded in other financial instruments are treated as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contract, and the host contract is not itself held for trading or designated at fair value through profit or loss. The embedded derivatives separate from the host are carried at fair on the trading portfolio with changes in fair value recognized in profit or loss.

Hedge accounting

To manage the risks associated with fluctuations in cash flows from receipt and payment of interest, as well as with fluctuations in the fair value of certain items, the Bank uses derivative financial instruments. As a result, the Bank applies hedge accounting for transactions that meet specified criteria.

At inception of the hedge accounting relationship, the Bank formally documents the relationship between the hedged item and the hedging instrument, including the nature of the risk, the risk management objective and strategy for undertaking the hedge and the method that will be used to assess the effectiveness of the hedging relationship at inception and on an ongoing basis.

At each hedge effectiveness assessment date, a hedge relationship must be expected to be highly effective on a prospective basis and demonstrate that it was highly effective (retrospective effectiveness) for the designated period in order to qualify for hedge accounting. A formal assessment is undertaken both at inception and at each month end on an ongoing basis. A hedge is expected to be highly effective if the changes in fair value or cash flows attributable to the hedged risk during the period for which the hedge is designated were offset by the hedging instrument in a range of 80% to 125% during the hedging period.

Fair value hedges

For designated and qualifying fair value hedges, the cumulative change in the fair value of a hedging derivative is recognised in the separate income statement in Net gains (losses) from revaluation of hedging instruments. Meanwhile, the cumulative change in the fair value of the hedged item attributable to the risk hedged is recorded as part of the carrying value of the hedged item in the separate statement of financial position and is also recognised in the separate income statement in Net gains (losses) from revaluation of hedging instruments.

If the hedging instrument expires or is sold, terminated or exercised, or where the hedge no longer meets the criteria for hedge accounting, or the Bank decides to voluntarily discontinue the hedging relationship, the hedge relationship is discontinued prospectively. When the hedge ceases, the adjustment of the carrying amount of the hedged financial instrument is amortized over the remaining period until date of maturity of the hedged financial instrument. If the hedged item is derecognised, the unamortized amount of the adjustment is recognized in profit or loss.

Cash flow hedges

For designated and qualifying cash flow hedges, the effective portion of the cumulative gain or loss on the hedging instrument is initially recognized in separated other comprehensive income and is recorded through other comprehensive income. An ineffective portion of the gain or loss on the hedging instrument is recognized in the separated income statement.

(Thousands of euros)

3. Summary of accounting policies (continued)

Hedge accounting (continued)

When a hedging instrument expires, is sold, terminated, exercised, or when a hedge no longer meets the criteria for hedge accounting, the total amount of income or expense accumulated at that time in equity is transferred from equity and recognized in the separated statement of income in the same period or periods during which hedged projected cash flows affect profit or loss. When a forecast transaction is no longer expected, the cumulative gain or loss recognized in equity is immediately transferred to the separated income statement.

Borrowings

Issued financial instruments or their components are classified as liabilities, where the substance of the contractual arrangement results in the Bank having an obligation either to deliver cash or another financial asset to the holder, or to satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity instruments. Such instruments include amounts due to banks and other financial institutions, long-term loans of banks and debt securities issued. After initial recognition, borrowings are subsequently measured at amortized cost using the effective interest method. Gains and losses are recognized in profit or loss when the borrowings are derecognized as well as through the amortization process.

Leases

Operating – Bank as lessee

Leases of assets under which the risks and rewards of ownership are effectively retained by the lessor are classified as operating leases. Lease payments under an operating lease are recognized as expenses on a straight-line basis over the lease term and included into general and administrative expenses.

Operating – Bank as lessor

The Bank presents assets subject to operating leases in the separate statement of financial position according to the nature of the asset. Lease income from operating leases is recognized in the separate income statement over the lease term within net non-interest income on “Income from lease of investment property”. The aggregate cost of incentives provided to lessees is recognized as a reduction of rental income over the lease term on a straight-line basis. Initial direct costs incurred specifically to earn revenues from an operating lease are added to the carrying amount of the leased asset.

Measurement of financial instruments at initial recognition

When financial instruments are recognized initially, they are measured at fair value, adjusted, in the case of instruments not at fair value through profit or loss, for directly attributable fees and costs.

The best evidence of the fair value of a financial instrument at initial recognition is normally the transaction price. If the Bank determines that the fair value at initial recognition differs from the transaction price, then:

- ▶ If the fair value is evidenced by a quoted price in an active market for an identical asset or liability (i.e., a Level 1 input) or based on a valuation technique that uses only data from observable markets, the Bank recognizes the difference between the fair value at initial recognition and the transaction price as a gain or loss.
- ▶ In all other cases, the initial measurement of the financial instrument is adjusted to defer the difference between the fair value at initial recognition and the transaction price. After initial recognition, the Bank recognizes that deferred difference as a gain or loss only when the inputs become observable, or when the instrument is derecognized.

Offsetting of financial instruments

Financial assets and liabilities are offset and the net amount is reported in the separate statement of financial position when there is a legally enforceable right to set off the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the separate statement of financial position.

(Thousands of euros)

3. Summary of accounting policies (continued)

Impairment of financial assets

The Bank assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred “loss event”) and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated.

Evidence of impairment may include indications that the borrower or a group of borrowers is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that may be related to defaults.

Deposits with banks and other financial institutions, long-term loans to banks, trade financing loans, and loans to customers

For deposits with banks and other financial institutions, long-term loans to banks, trade financing loans, and loans to customers carried at amortized cost, the Bank first assesses individually whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Bank determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risks characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognized are not included in a collective assessment of impairment.

If there is an objective evidence that an impairment loss exists, the amount of the loss is measured as the difference between the assets' value in the separate statement of financial position and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The value of the asset in the separate statement of financial position is reduced through the use of an allowance account and the amount of the loss is recognized in the separate income statement. Interest income continues to be accrued on the reduced carrying amount of asset based on the original effective interest rate of the asset. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realized or has been transferred to the Bank. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or reduced by adjusting the allowance account.

If amounts previously written off are later recovered, the recovery is credited to the separate income statement.

The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate. If a financial asset is provided at a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate. The calculation of the present value of the estimated future cash flows of a collateralized financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

Future cash flows on a group of financial assets that are collectively evaluated for impairment are estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the years on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently. Estimates of changes in future cash flows reflect, and are directionally consistent with, changes in related observable data from year to year (such as changes in unemployment rates, property prices, commodity prices, payment status, or other factors that are indicative of incurred losses in the group or their magnitude).

The methodology and assumptions used for estimating future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

(Thousands of euros)

3. Summary of accounting policies (continued)

Impairment of financial assets (continued)

Held-to-maturity financial investments

For held-to-maturity investments the Bank assesses individually whether there is objective evidence of impairment. If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows. The carrying amount of the asset is reduced and the amount of the loss is recognized in profit or loss.

If, in a subsequent year, the amount of the estimated impairment loss decreases because of an event occurring after the impairment was recognized, any amounts formerly charged are credited to the separate income statement.

Available-for-sale financial investments

For available-for-sale financial instruments, the Bank determines at each reporting date whether there is objective evidence that an instrument or a group of instruments is impaired.

In the case of equity investments classified as available-for-sale, objective evidence would include a significant or prolonged decline in the fair value of the investment below its acquisition cost. Where there is evidence of impairment, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognized in the separate income statement – is reclassified from other comprehensive income to the separate income statement. Impairment losses on equity investments are not reversed through the separate income statement; increases in their fair value after impairment are recognized in other comprehensive income.

In the case of debt instruments classified as available-for-sale, impairment is assessed based on the same criteria as financial assets carried at amortized cost. Future interest income is based on the reduced carrying amount and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

The interest income is recorded in the separate income statement. If, in a subsequent year, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in the separate income statement, the impairment loss is reversed through the separate income statement.

Renegotiated loans

Where possible, the Bank seeks to restructure loans rather than to take possession of collateral. This may involve extending the payment arrangements and the agreement of new loan conditions. The accounting treatment of such restructuring is as follows:

- ▶ If the currency of the loan has been changed the old loan is derecognized and the new loan is recognized in the separate statement of financial position.
- ▶ If the loan restructuring is not caused by the financial difficulties of the borrower the Bank uses the same approach as for financial liabilities described below.
- ▶ If the loan restructuring is due to the financial difficulties of the borrower and the loan is impaired after restructuring, the Bank recognizes the difference between the present value of the new cash flows discounted using the original effective interest rate and the carrying amount before restructuring in the provision charges for the period.

Once the terms have been renegotiated, the loan is no longer considered past due. Management continuously reviews renegotiated loans to ensure that all criteria are met and that future payments are likely to occur. The loans continue to be subject to an individual or collective impairment assessment, calculated using the loan's original or current effective interest rate.

(Thousands of euros)

3. Summary of accounting policies (continued)

Derecognition of financial assets and liabilities

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized in the separate statement of financial position where:

- ▶ The rights to receive cash flows from the asset have expired.
- ▶ The Bank has transferred its rights to receive cash flows from the asset, or retained the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a "pass-through" arrangement.
- ▶ The Bank either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the Bank has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Bank's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Bank could be required to repay.

Where continuing involvement takes the form of a written and/or purchased option (including a cash-settled option or similar provision) on the transferred asset, the extent of the Bank's continuing involvement is the amount of the transferred asset that the Bank may repurchase, except that in the case of a written put option (including a cash-settled option or similar provision) on an asset measured at fair value, the extent of the Bank's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

Financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or canceled or expires.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the separate income statement.

Financial guarantees

In the ordinary course of business, the Bank gives financial guarantees, consisting of letters of credit, guarantees and acceptances. Financial guarantees are initially recognised in the separate financial statements at fair value, in "Other liabilities", being the premium received. Subsequent to initial recognition, the Bank's liability under each guarantee is measured at the higher of the amortised premium and the best estimate of expenditure required to settle any financial obligation arising as a result of the guarantee.

Any increase in the liability relating to financial guarantees is taken to the separate statement of profit or loss. The premium received is recognised in profit or loss on a straight-line basis over the life of the guarantee.

Property and equipment

Property and equipment are carried in the separate financial statements at cost, excluding the costs of day-to-day servicing, less accumulated depreciation and any accumulated impairment, excluding buildings carried at revalued cost, as described below. Such cost includes the cost of replacing part of equipment when that cost is incurred if the recognition criteria are met.

The carrying amounts of property and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

*(Thousands of euros)***3. Summary of accounting policies (continued)****Property and equipment (continued)**

Where an item of property and equipment comprises major components having different useful lives, they are accounted for as separate items of property and equipment.

Following initial recognition at cost, buildings are carried at a revalued amount, which is the fair value at the date of the revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Valuations of buildings are performed frequently enough to ensure that the fair value of a revalued asset does not differ materially from its carrying amount.

Accumulated depreciation as at the revaluation date is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. Any revaluation surplus is credited to the revaluation reserve for property and equipment included in other comprehensive income, except to the extent that it reverses a revaluation decrease of the same asset previously recognized in the separate income statement, in which case the increase is recognized in profit or loss. A revaluation deficit is recognized in the separate income statement, except that a deficit directly offsetting a previous surplus on the same asset is directly offset against the surplus in the revaluation reserve for property and equipment.

Upon disposal, any revaluation reserve relating to the particular asset being sold is transferred to retained earnings.

Depreciation of property and equipment (including self-constructed property and equipment) begins when it is available for use and is recognized in the separate income statement. Depreciation is calculated on a straight-line basis over the following estimated useful lives:

	<u>Years</u>
Buildings	85
Equipment	3-7
Computers	3-6
Office furniture	5-10
Motor vehicles	4

The asset's residual values, useful lives and methods are reviewed, and adjusted as appropriate, at each financial year end.

Costs related to repairs and renewals are charged when incurred and included in general and administrative expenses, unless they qualify for capitalization.

Investment property

Investment property includes buildings held to earn rental income or for capital appreciation and which are not used by the Bank or held for the sale in the ordinary course of business. Property that is being constructed or developed or redeveloped for future use as investment property is also classified as investment property.

Investment property is initially recognized at cost, including transaction costs, and subsequently remeasured at fair value reflecting market conditions at the end of the reporting period. Fair value of the Bank's investment property is determined on the base of various sources including reports of independent appraisers, who hold a recognized and relevant professional qualification and who have recent experience in valuation of property of similar location and category.

Investment property that is being redeveloped for continuing use as investment property or for which the market has become less active continues to be measured at fair value. Earned rental income is recorded in the separate income statement within Income from lease of investment property. Gains and losses resulting from changes in the fair value of investment property are recorded in the separate income statement and presented within gains/(losses) from revaluation of investment property.

Subsequent expenditure is subject to capitalization only when it is probable that future economic benefits associated with an asset will flow to the Bank and it can be measured reliably. All other repairs and maintenance costs are expensed when incurred. If an investment property becomes owner-occupied, it is reclassified to buildings, and its carrying amount at the date of reclassification becomes its deemed cost to be subsequently depreciated.

*(Thousands of euros)***3. Summary of accounting policies (continued)****Intangible assets**

The useful lives of intangible assets are assessed to be finite and include the value of computer software. Intangible assets acquired are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses. Amortisation is calculated using the straight-line method. Intangible assets are tested for impairment if any indication of impairment exists. The amortisation period and the amortisation method for an intangible asset with a indefinite useful life are reviewed at least at each financial year-end. Amortisation is calculated using the straight-line method to write down the cost of intangible assets to their residual values over their estimated useful lives, as follows:

	<u>Years</u>
Automated banking system	20
Other computer software	1-5

Assets classified as held for sale

The Bank classifies a non-current asset as held for sale if its carrying amount will be recovered principally through a sale transaction rather than through continuing use. For this to be the case, the non-current asset must be available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets and its sale must be highly probable.

The sale qualifies as highly probable if the Bank's management is committed to a plan to sell the non-current asset and an active program to locate a buyer and complete the plan must have been initiated. Further, the non-current asset must have been actively marketed for a sale at price that is reasonable in relation to its current fair value and in addition the sale should be expected to qualify for recognition as a completed sale within one year from the date of classification of the non-current asset as held for sale.

The Bank measures an asset classified as held for sale at the lower of its carrying amount and fair value less costs to sell. The Bank recognizes an impairment loss for any initial or subsequent write-down of the asset to fair value less costs to sell if events or changes in circumstance indicate that their carrying amount may be impaired.

Provisions

Provisions are recognized when the Bank has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount of obligation can be made.

Equity

In accordance with amendments to IAS 32, *Financial Instruments: Presentation*, and IAS 1, *Presentation of Financial Statements – Puttable Financial Instruments and Obligations Arising on Liquidation*, that were issued in February 2008, participants' shares are recognized in equity and not in liabilities.

Contingencies

Contingent liabilities are not recognized in the separate statement of financial position but are disclosed unless the possibility of any outflow in settlement is remote. A contingent asset is not recognized in the separate statement of financial position but disclosed in the separate financial statements, when an inflow of economic benefits is probable.

Recognition of income and expenses

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Bank and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized in the separate financial statements:

(Thousands of euros)

3. Summary of accounting policies (continued)

Recognition of income and expenses (continued)

Interest and similar income and expense

For all financial instruments measured at amortized cost and interest bearing securities classified as trading or available-for-sale, interest income or expense is recorded at the effective interest rate, which is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or financial liability. The calculation takes into account all contractual terms of the financial instrument (for example, prepayment options) and includes any fees or incremental costs that are directly attributable to the instrument and are an integral part of the effective interest rate, but not future credit losses. The carrying amount of the financial asset or financial liability is adjusted if the Bank revises its estimates of payments or receipts. The adjusted carrying amount is calculated based on the original effective interest rate and the change in carrying amount is recorded as interest income or expense.

Once the recorded value of a financial asset or a group of similar financial assets has been reduced due to an impairment loss, interest income continues to be recognized using the original effective interest rate applied to the new carrying amount.

Fee and commission income

The Bank earns fee and commission income from a diverse range of services it provides to its customers. Fee income can be divided into the following two categories:

- ▶ *Fee income earned from services that are provided over a certain period of time*

Fees earned for the provision of services over a period of time are accrued over that period. Loan commitment fees for loans that are likely to be drawn down and other credit related fees are deferred (together with any incremental costs) and recognized as an adjustment to the effective interest rate on the loan.

- ▶ *Other fee and commission income*

Fees earned for the provision of transaction services are recognized on completion of the underlying transaction. Fees or components of fees that are linked to a certain performance are recognized after fulfilling the corresponding criteria.

Fee and commission expense

Fee and commission expenses comprise commissions on securities transactions and commissions on cash settlement transactions. Commissions paid on purchase of securities classified as financial instruments at fair value through profit or loss are recognized in the separate income statement at the purchase date. Commissions paid on all other purchases of securities are recognized as an adjustment to the carrying amount of the instrument with corresponding adjustment to its effective yield.

Dividend income

Revenue is recognized when the Bank's right to receive the payment is established.

Assets under trust

Assets under trust management are not reported in separate financial statements, as they are not assets of the Bank.

Segment reporting

The reportable segments of the Bank comprise the following operating segments: Credit and investment activity, Treasury, Other operations.

(Thousands of euros)

3. Summary of accounting policies (continued)

Standards issued but not yet effective

The standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Bank's separate financial statements are disclosed below. The Bank intends to adopt these standards, if applicable, when they become effective.

IFRS 9 Financial Instruments

In July 2014, the IASB issued the final version of *IFRS 9 Financial Instruments* which reflects all phases of the financial instruments project and replaces *IAS 39 Financial Instruments: Recognition and Measurement* and all previous versions of IFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting.

From a classification and measurement perspective, the new standard will require all financial assets, except equity instruments and derivatives, to be assessed based on a combination of the entity's business model for managing the assets and the instruments' contractual cash flow characteristics. The IAS 39 measurement categories will be replaced by: fair value through profit or loss (FVPL), fair value through other comprehensive income (FVOCI), and amortized cost categories.

IFRS 9 will also allow entities to continue to irrevocably designate instruments that qualify for amortized cost or FVOCI instruments as FVPL, if doing so eliminates or significantly reduces a measurement or recognition inconsistency. Equity instruments that are not held for trading may be irrevocably designated as FVOCI, with no subsequent reclassification of gains or losses to the income statement. The accounting for financial liabilities will largely be the same as the requirements of IAS 39.

IFRS 9 will also fundamentally change the approach to loan impairment. The standard will replace IAS 39's incurred loss approach with a forward-looking expected credit loss (ECL) approach. The Bank will be required to record an allowance for expected losses for all loans and other debt financial assets not carried at FVPL, as well as for loan commitments and financial guarantee contracts. The allowance is based on the expected credit losses associated with the probability of default in the next twelve months unless there has been a significant increase in credit risk since origination, in which case the allowance would be based on the probability of default over the life of the asset.

IFRS 9 is effective for annual periods beginning on or after 1 January 2018, with early application permitted. Retrospective application is required, but restatement of comparative information is not required; the effect on the transition date – 1 January 2018 – would be recorded in retained earnings. The adoption of IFRS 9 is not expected to have a significant effect on the classification and measurement of the Bank's financial assets and will have no impact on the classification and measurement of the Bank's financial liabilities. The Bank expects to measure investment securities at fair value through OCI as the Bank expects not only to hold the assets to collect contractual cash flows but also to sell a significant amount on a relatively frequent basis. Deposits with banks and other financial institutions, loans to banks and loans to customers are held to collect contractual cash flows and are expected to give rise to cash flows representing solely payments of principal and interest. Thus, the Bank expects to continue measuring those financial assets at amortized cost under IFRS 9. The Bank plans to adopt the new standard on the required effective date. In 2016, the Bank made a general assessment of the impact of all three phases of IFRS 9. This preliminary assessment is based on currently available information and may be subject to changes arising from further detailed analyses or additional reasonable and supportable information that will become available to the Bank in the future. On the whole, the Bank does not expect the adoption of the new requirements to have a significant impact on its balance sheet or equity, except for the effect of adoption of IFRS 9 impairment requirements. The Bank expects an increase in level of provisions which will influence an equity, and will perform a detailed assessment to determine the amount of such increase. The Bank believes that all existing hedge relationships currently designated at the discretion of the Bank in effective hedging relationships will still qualify for hedge accounting under IFRS 9. As IFRS 9 does not change the general principles of how an entity accounts for effective hedges, the Bank does not expect a significant impact as a result of adoption of IFRS 9. The Bank will assess possible changes related to the accounting for the time value of options, forward points or the currency basis spread in more detail in the future.

(Thousands of euros)

3. Summary of accounting policies (continued)

Standards issued but not yet effective (continued)

IFRS 15 Revenue from Contracts with Customers

In May 2014, the IASB issued IFRS 15 *Revenue from Contracts with Customers*, effective for periods beginning on 1 January 2018 with early adoption permitted. IFRS 15 defines principles for recognizing revenue and will be applicable to all contracts with customers. However, interest and fee income integral to financial instruments and leases will continue to fall outside the scope of IFRS 15 and will be regulated by the other applicable standards (e.g., IFRS 9, and IFRS 16 *Leases*).

Revenue under IFRS 15 will need to be recognized as goods and services are transferred, to the extent that the transferor anticipates entitlement to goods and services.

The standard will also specify a comprehensive set of disclosure requirements regarding the nature, extent and timing as well as any uncertainty of revenue and corresponding cash flows with customers.

The Bank does not anticipate early adopting IFRS 15 and is currently evaluating its impact.

IFRS 16 Leases

The IASB issued the new standard for accounting for leases – IFRS 16 *Leases* in January 2016. The new standard does not significantly change the accounting for leases for lessors. However, it does require lessees to recognize most leases on their balance sheets as lease liabilities, with the corresponding right-of-use assets. Lessees must apply a single model for all recognized leases, but will have the option not to recognize ‘short-term’ leases and leases of ‘low-value’ assets. Generally, the profit or loss recognition pattern for recognized leases will be similar to today’s finance lease accounting, with interest and depreciation expense recognized separately in the statement of profit or loss.

IFRS 16 is effective for annual periods beginning on or after 1 January 2019. Early application is permitted provided the new revenue standard, IFRS 15, is applied on the same date.

The Bank does not anticipate early adopting IFRS 16 and is currently evaluating its impact.

Amendments to IAS 12 Income Taxes

In January 2016, through issuing amendments to IAS 12, the IASB clarified the accounting treatment of deferred tax assets of debt instruments measured at fair value for accounting, but measured at cost for tax purposes. The Bank does not anticipate that adopting the amendments would have a material impact on its separate financial statements.

Amendments to IAS 7 Statement of Cash Flows

In January 2016, the IASB issued amendments to IAS 7 *Statement of Cash Flows* with the intention to improve disclosures of financing activities and help users to better understand the reporting entities’ liquidity positions. Under the new requirements, entities will need to disclose changes in their financial liabilities as a result of financing activities such as changes from cash flows and non-cash items (e.g., gains and losses due to foreign currency movements). The amendment is effective from 1 January 2017. The Bank is currently studying the application of these amendments.

Amendments to IFRS 2 Share-based Payment

The IASB issued amendments to IFRS 2 *Share-based Payment* in relation to the classification and measurement of share-based payment transactions. The amendments are intended to eliminate diversity in practice, but are narrow in scope and address specific areas of classification and measurement. The amendments address three main areas:

- ▶ The effects of vesting conditions on the measurement of a cash-settled share-based payment transaction.
- ▶ The classification of a share-based payment transaction with net settlement features for withholding tax obligations.
- ▶ The accounting where a modification to the terms and conditions of a share-based payment transaction changes its classification from cash-settled to equity-settled.

(Thousands of euros)

3. Summary of accounting policies (continued)

Standards issued but not yet effective (continued)

These amendments are effective for annual periods beginning on or after 1 January 2018. On adoption, entities are required to apply the amendments without restating prior periods, but retrospective application is permitted if elected for all three amendments and other criteria are met. Early application is permitted. These amendments are not expected to have any impact on the Bank.

Applying IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts – Amendments to IFRS 4

The amendments address concerns arising from implementing the new financial instruments Standard, IFRS 9, before implementing the new insurance contracts standard that the Board is developing to replace IFRS 4.

The amendments introduce two options for entities issuing insurance contracts: a temporary exemption from applying IFRS 9 and an overlay approach. The optional temporary exemption from IFRS 9 is available to entities whose activities are predominantly connected with insurance. The temporary exemption permits such entities to continue to apply IAS 39 *Financial Instruments: Recognition and Measurement* while they defer the application of IFRS 9 until 1 January 2021 at the latest. The overlay approach requires an entity to remove from profit or loss additional volatility that may arise if IFRS 9 is applied with IFRS 4.

The temporary exemption is first applied for reporting periods beginning on or after 1 January 2018. An entity may elect the overlay approach when it first applies IFRS 9 and apply that approach retrospectively to financial assets designated on transition to IFRS 9. These amendments are not expected to have any impact to the Bank.

Applying IFRS 10 and IAS 28 - Sale or transfer of assets between an investor and its associate or joint venture

The amendments eliminate a known discrepancy between the requirements of IFRS 10 and IAS 28 for the loss of control of a subsidiary that is transferred to an associate or a joint venture as a contribution to equity. The amendments clarify that the income or loss arising from the sale or transfer by an investor of assets that are business in accordance with the definition in IFRS 3 in favor of its associate or joint venture should be fully reflected. In December 2015, the IASB decided to postpone the effective date of these amendments indefinitely.

Transfers of Investment Property (Amendments to IAS 40)

The amendments clarify when an entity should transfer property, including property under construction or development into, or out of investment property. The amendments state that a change in use occurs when the property meets, or ceases to meet, the definition of investment property and there is evidence of the change in use.

Entities should apply the amendments prospectively to changes in use that occur on or after the beginning of the annual reporting period in which the entity first applies the amendments. An entity should reassess the classification of property held at that date and, if applicable, reclassify property to reflect the conditions that exist at that date. The amendments effective for annual periods beginning on or after 1 January 2018. Early application of the amendments is permitted and must be disclosed.

IFRIC Interpretation 22 Foreign Currency Transactions and Advance Consideration

The interpretation clarifies that in determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which an entity initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, then the entity must determine a date of the transactions for each payment or receipt of advance consideration. Entities may apply the amendments on a fully retrospective basis. Early application of interpretation is permitted and must be disclosed. The Bank does not anticipate early adopting of interpretation and is currently evaluating its impact. The interpretation is effective for annual periods beginning on or after 1 January 2018.

(Thousands of euros)

4. Significant accounting judgments and estimates

Assumptions and estimation uncertainty

In the process of applying the Bank's accounting policies, management has made its professional judgments, used several assumptions and estimates on determining the amounts of assets and liabilities recognized in the separate financial statements, which have the most significant effect on the amounts recognized in the separate financial statements and the carrying amount of assets and liabilities in the following financial year. Estimates and assumptions are continuously assessed and are based on management experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The most significant uses of judgments and estimates are as follows:

Allowance for impairment of loans and other financial assets carried at amortized cost

Financial assets are recorded in the Bank's separate statement of financial position less allowances for impairment. The Bank regularly reviews its financial assets to assess impairment. When assessing impairment losses, the Bank uses its professional judgment in relation to objective evidences that future contractual cash flows on financial asset shall decrease. These evidences may include information on financial difficulties of the borrower or other observable data on adverse changes in the payment status of borrowers, or national or local economic conditions that correlate with defaults on assets. The Bank uses its professional judgment to adjust observable data for financial assets to reflect current circumstances. Impairment loss may be reversed only if a subsequent increase of estimated contractual cash flows can be objectively related to an event occurring after the impairment loss was recognized.

Fair value of financial instruments

Where the fair values of financial assets and financial liabilities recorded in the separate statement of financial position cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models. The input to these models is taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. More details are provided in Note 24.

Impairment of available-for-sale equity securities

The Bank determines that available-for-sale equity investment securities are impaired when there has been a significant or prolonged decline in the fair value below their cost.

The determination of what is significant or prolonged requires judgment. In making this judgment, the Bank evaluates, among other factors, the volatility of share prices. In addition, impairment may take place when there is evidence of a deterioration in the financial health of the investee, industry and sector performance, changes in technology, and operating or financing cash flows.

Fair values of buildings and investment property

As disclosed in Note 3, the Bank applies the fair value model with regard to investment property. Buildings included in fixed assets are stated at revalued amount.

As for buildings within property and equipment, the Bank monitors the compliance of the present value of buildings with their fair value and performs revaluation to ensure that there are no significant differences. Changes in the fair value are recognized in other comprehensive income. The most recent revaluation of the Bank's building was carried out as at 31 December 2016 by an independent firm of professional appraisers applying an appropriate valuation methodology and information on transactions with similar real estate objects on the local market. However, valuation results based on the above valuation technique may differ from the prices of actual transactions in the real estate market. Starting from 31 December 2016, the revalued building is depreciated in accordance with the remaining useful life.

As for investment property, the Bank monitors changes in its fair value at each reporting date to ensure that the present value of investment property does not differ materially from its fair value. Changes in the fair value of investment property are recognized in the separate income statement. The most recent revaluation of the Bank's investment property was carried out as at 31 December 2016 by an independent firm of professional appraisers applying an appropriate valuation methodology and information on transactions with similar real estate objects on the local market.

However, valuation results based on the above valuation technique may differ from the prices of actual transactions in the real estate market.

*(Thousands of euros)***4. Significant accounting judgments and estimates (continued)****Assumptions and estimation uncertainty (continued)**

In particular, information on significant areas of estimation uncertainty and critical judgments in applying accounting policies is presented in the following notes:

- ▶ Note 7 – Derivative financial instruments.
- ▶ Note 8 – Available-for-sale investment securities.
- ▶ Note 10 – Loans to banks.
- ▶ Note 11 – Loans to customers.
- ▶ Note 12 – Investment property.
- ▶ Note 13 – Property, equipment and intangible assets.
- ▶ Note 19 – Contingencies and lending commitments.

5. Cash and cash equivalents

Cash and cash equivalents comprise:

	<u>2016</u>	<u>2015</u>
Cash on hand	89	66
Nostro accounts with banks and other financial institutions:		
<i>Credit rating from A- to A+</i>	62,548	21,106
<i>Credit rating from BBB- to BBB+</i>	4,526	3,059
<i>Credit rating from BB- to BB+</i>	551	265
Total nostro accounts with banks and other financial institutions	67,625	24,430
Short-term deposits with banks:		
Term deposits with banks		
<i>Credit rating from BBB- to BBB+</i>	–	18,304
<i>Credit rating from BB- to BB+</i>	25,302	16,634
Total short-term deposits with banks	25,302	34,938
Cash and cash equivalents	93,016	59,434

Cash and cash equivalents are neither impaired, nor past due.

6. Deposits with banks and other financial institutions

Deposits with banks and other financial institutions are presented based on contractual terms and include the following items:

	<u>2016</u>	<u>2015</u>
Term deposits up to 1 year:		
<i>Credit rating from BB- to BB+</i>	–	6,037
<i>Credit rating from B- to B+</i>	37,126	79,276
Total term deposits up to 1 year	37,126	85,313
Term deposits over 1 year:		
<i>Credit rating from A- to A+</i>	5,821	15,067
<i>Credit rating from BB- to BB+</i>	2,390	–
Total term deposits over 1 year	8,211	15,067
Total deposits with banks and other financial institutions	45,337	100,380

Amounts due from the National Bank of the Republic of Cuba

	<u>2016</u>	<u>2015</u>
Term deposits with the National Bank of the Republic of Cuba without credit rating	34,967	34,967
Less: allowance for impairment	(34,967)	(34,967)
Term deposits with the National Bank of the Republic of Cuba	–	–

(Thousands of euros)

6. Deposits with banks and other financial institutions (continued)**Concentration of deposits with banks and other financial institutions**

As at 31 December 2016, the Bank had three counterparties (31 December 2015: five counterparty) accounting for over 10% of the Bank's total deposits with banks and other financial institutions, except for deposits with the National Bank of the Republic of Cuba.

7. Derivative financial instruments

The Bank performs the operations with currency and other derivative financial instruments which are generally traded in an over-the-counter market with professional market counterparties on standardized contractual terms and conditions. Derivative financial instruments have either potentially favorable terms (and are assets) or potentially unfavorable conditions (and are liabilities) as a result of fluctuations in the exchange rates or other variable factors associated with these instruments. The fair value of derivative financial instruments can vary significantly depending on the potentially favorable and unfavorable conditions.

The table below shows the fair value of derivative financial instruments as at 31 December 2016 and 31 December 2015 and notional amounts of term contracts for the purchase and sale of foreign currency specifying contractual exchange rates.

	31 December 2016				
	<i>Notional amount</i>		<i>Weighted average exchange rate</i>	<i>Fair value</i>	
	<i>Purchase</i>	<i>Sale</i>		<i>Assets</i>	<i>Liabilities</i>
Derivative financial assets and liabilities at fair value through profit or loss					
Swaps	RUB 9,136,720 thousand	EUR 132,150 thousand	69.42	14,246	883
	RON 110,300 thousand	EUR 24,971 thousand	4.44	–	632
	EUR 117,000 thousand	USD 128,825 thousand	1.10	116	5,704
	EUR 8,000 thousand	RUB 572,280 thousand	71.54	–	788
Forwards	EUR 34,000 thousand	USD 37,896 thousand	1.11	–	2,080
Total derivative financial assets and liabilities at fair value through profit or loss				14,362	10,087
Derivative financial assets and liabilities designated as hedging instruments					
Swaps	RON 298,300 thousand	EUR 67,068 thousand	4.45	–	1,536
Total derivative financial assets and liabilities designated as hedging instruments				–	1,536
Derivative financial instruments				14,362	11,623

	31 December 2015				
	<i>Notional amount</i>		<i>Weighted average exchange rate</i>	<i>Fair value</i>	
	<i>Purchase</i>	<i>Sale</i>		<i>Assets</i>	<i>Liabilities</i>
Derivative financial assets and liabilities at fair value through profit or loss					
Swaps	RUB 12,136,720 thousand	EUR 185,914 thousand	65.28	–	29,034
	RON 110,300 thousand	EUR 24,972 thousand	4.42	–	864
	EUR 61,000 thousand	USD 64,982 thousand	1.07	1,775	–
Forwards	EUR 30,000 thousand	USD 32,721 thousand	1.09	69	–
Total derivative financial assets and liabilities at fair value through profit or loss				1,844	29,898
Derivative financial instruments				1,844	29,898

(Thousands of euros)

7. Derivative financial instruments (continued)

Due to issuing bond loans denominated in currencies other than the functional currency of the Bank (Note 17), the Bank concluded cross currency interest rate swaps and currency forwards on an arm's length basis with large international and Russian credit institutions. These swaps are used to manage long-term currency risks of the Bank. Payment netting is not applied to the parties' obligations in respect of interest and principal payments.

The notional amount, recorded gross, is the amount of a derivative's underlying asset and liability and is the basis upon which changes in the value of derivatives are measured. The notional amounts indicate the volume of transactions outstanding at the end of the reporting period and are not indicative of the credit risk.

As at 31 December 2016 and 31 December 2015, the Bank has positions in the following types of derivatives:

Forwards: Forward contracts are contractual agreements to buy or sell a specified financial instrument at a specific price and date in the future. Forwards are customized contracts transacted in the over-the-counter market.

Swaps: Swaps are contractual agreements between two parties to exchange movements in interest and foreign currency rates and equity indices, and (in the case of credit default swaps) to make payments with respect to defined credit events based on specified notional amounts.

Fair value measurement is based on the corresponding forward curves that depend on exchange rates, interest rates and swap contract maturity. For the fair value of swaps, the discount rate was calculated on the basis of zero coupon yield curve and credit risk. Changes in the fair value of swaps were mainly due to the increase in the forward EUR to RUB exchange rates.

8. Available-for-sale investment securities

Available-for-sale investment securities comprise:

	<u>2016</u>	<u>2015</u>
<i>Owned by the Bank</i>		
Quoted debt securities		
Government bonds		
<i>Eurobonds issued by governments of member countries</i>	52,678	93,027
Government bonds	<u>52,678</u>	<u>93,027</u>
Corporate bonds		
<i>Credit rating from A- to A+</i>	21,152	–
<i>Credit rating from BBB- to BBB+</i>	21,861	–
<i>Credit rating from BB- to BB+</i>	57,579	–
<i>Credit rating from B- to B+</i>	17,575	–
Corporate bonds	<u>118,167</u>	–
Total quoted debt securities	<u>170,845</u>	<u>93,027</u>
Quoted equity instruments		
<i>No credit rating</i>	4	4
Total quoted equity instruments	<u>4</u>	<u>4</u>
Available-for-sale investment securities	<u>170,849</u>	<u>93,031</u>
<i>Pledged under repurchase agreements</i>		
Quoted debt securities		
<i>Eurobonds issued by governments of member countries</i>	10,286	21,646
<i>Eurobonds issued by governments of non-member countries</i>	7,597	–
Government bonds	<u>17,883</u>	<u>21,646</u>
Corporate bonds		
<i>Credit rating AAA</i>	22,486	–
<i>Credit rating from AA- to AA+</i>	4,688	–
<i>Credit rating from A- to A+</i>	32,521	–
<i>Credit rating from BBB- to BBB+</i>	4,994	1,382
<i>Credit rating from BB- to BB+</i>	15,886	–
Corporate bonds	<u>80,575</u>	<u>1,382</u>
Total quoted available-for-sale debt securities pledged under repurchase agreements	<u>98,458</u>	<u>23,028</u>

(Thousands of euros)

8. Available-for-sale investment securities (continued)

Government bonds represent EUR-denominated, USD-denominated and RUB-denominated securities issued and guaranteed by the Ministries of Finance of these countries, maturing in 2018-2027 (31 December 2015: maturing in 2018-2027). The annual coupon rate for these bonds varies from 0.4% to 7.9% (31 December 2015: from 2.0% to 6.0%).

Corporate bonds are represented by the bonds issued by large companies and banks of member countries of the Bank, as well as corporate international companies and Development Banks that have similar goals and missions with the Bank, maturing in 2018-2031 (31 December 2015: maturing in 2020). The annual coupon rate for these bonds varies from 0.6% to 10.25% (31 December 2015: 5.0%).

9. Held-to-maturity investment securities

In July 2016, due to changes in the Bank's management's intent to withhold investment securities to maturity, the Bank reclassified these securities into investment securities available for sale. At the date of reclassification, the amortized cost of securities amounted to 92,105 thousand euros.

Held-to-maturity investment securities comprise:

	<u>2016</u>	<u>2015</u>
Owned by the Bank		
Quoted debt securities		
<i>Eurobonds issued by governments of member countries</i>	–	1,272
Government bonds of member countries	–	1,272
Corporate bonds		
<i>Credit rating from BBB- to BBB+</i>	–	17,442
<i>Credit rating from BB- to BB+</i>	–	31,320
Corporate bonds	–	48,762
Total quoted held-to-maturity debt securities	–	50,034
Held-to-maturity investment securities pledged under repurchase agreements		
Quoted debt securities		
<i>Eurobonds issued by governments of member countries</i>	–	10,489
Government bonds of member countries	–	10,489
Corporate bonds		
<i>Credit rating from BB- to BB+</i>	–	62,705
Corporate bonds	–	62,705
Total held-to-maturity investment securities pledged under repurchase agreements	–	73,194

Government bonds of member countries represent EUR-denominated and RUB-denominated securities issued and guaranteed by the Ministries of Finance of these countries maturing as at 31 December 2015 in 2018-2020. The annual coupon rate for these bonds as at 31 December 2015 varies from 3.6% to 7.9%.

Corporate bonds are represented by the bonds issued by major companies and banks of member countries and EU countries, maturing as at 31 December 2015 in 2016-2023. The annual coupon rate for these bonds as at 31 December 2015 varies from 3.0% to 7.9%.

10. Loans to banks

During 2016, the Bank continued its lending activities, being guided by the key priorities of the Development Strategy of the IIB. The principal lending activity is to facilitate the development of small and medium-sized businesses in the member countries and participate in financing of socially important infrastructure projects in these countries. The Bank considers national development institutes, export and import banks and agencies, international financial organizations and development banks as its key counterparties.

(Thousands of euros)

10. Loans to banks (continued)

In 2016 and 2015, the Bank provided long-term loans and trade-financing loans to banks operating in the following countries:

	<u>2016</u>	<u>2015</u>
Trade financing loans:		
Russian Federation	953	–
Trade financing loans	<u>953</u>	<u>–</u>
Long-term loans to banks:		
Mongolia	47,970	43,044
Russian Federation	26,425	64,223
Socialist Republic of Vietnam	19,019	33,330
Long-term loans to banks	<u>93,414</u>	<u>140,597</u>
Total loans to banks	<u>94,367</u>	<u>140,597</u>

As at 31 December 2016 and 31 December 2015, outstanding trade financing loans and long-term loans to banks are neither past due nor impaired, and no allowances for impairment of these loans were made.

Analysis of collateral for loans to banks

The following table provides an analysis of the portfolio of trade financing loans and long-term loans to banks by type of collateral as at 31 December 2016 and 31 December 2015:

	<u>2016</u>		<u>2015</u>	
	<i>Loans to banks</i>	<i>Share in the total loans, %</i>	<i>Loans to banks</i>	<i>Share in the total loans, %</i>
Pledge of real property (mortgage) and title	7,247	7.7	6,933	4.9
Uncollateralized part of the loans	87,120	92.3	133,664	95.1
	<u>94,367</u>	<u>100.0</u>	<u>140,597</u>	<u>100.0</u>

The amounts shown in the table above represent the carrying amount of the portfolio of long-term loans to banks, and do not necessarily represent the fair value of the collateral.

Concentration of long-term loans to banks

As at 31 December 2016, long-term loans and trade financing loans to five banks (31 December 2015: five banks) with the total amount of loans to each of them exceeding 10% of total loans to banks were recorded on the Bank's balance sheet. As at 31 December 2016, the total amount of such major loans was EUR 74,787 thousand (31 December 2015: EUR 85,238 thousand) and no impairment allowances (31 December 2015: no allowances) have been made for them.

11. Loans to customers

The Bank issued loans to customers operating in the following countries:

	<u>2016</u>	<u>2015</u>
Republic of Bulgaria	65,922	57,917
Russian Federation	61,213	28,160
Romania	40,235	25,844
Republic of Ecuador	39,570	18,249
Republic of Panama	36,276	–
Czech Republic	22,930	–
Slovak Republic	8,411	23,437
USA	6,108	–
Mongolia	5,683	21,890
Gross loans to customers	<u>286,348</u>	<u>175,497</u>
Less: allowance for loan impairment	(17,312)	(9,755)
Loans to customers	<u>269,036</u>	<u>165,742</u>

(Thousands of euros)

11. Loans to customers (continued)

The information on the overdue loans as at 31 December 2016 and 31 December 2015 is stated below:

	<u>2016</u>	<u>2015</u>
Loans with overdue principal and/or interest	14,769	14,858
Less: allowance for loan impairment	(14,769)	(9,755)
Overdue loans to customers	<u><u>–</u></u>	<u><u>5,103</u></u>

As at 31 December 2016 and 31 December 2015, there were no overdue but not impaired loans.

Allowance for impairment of loans to customers

A reconciliation of the allowance for loan impairment by country is as follows:

	<i>Slovak Republic</i>	<i>Republic of Bulgaria</i>	<i>Romania</i>	<i>Total</i>
At 1 January 2016	3,000	6,755	–	9,755
Net charge for the period	5,103	200	2,254	7,557
At 31 December 2016	8,103	6,955	2,254	17,312
Individual impairment	8,103	6,666	–	14,769
Gross amount of loans, individually determined to be impaired, before deducting any individually assessed impairment allowance	8,103	6,666	–	14,769
	<i>Slovak Republic</i>	<i>Republic of Bulgaria</i>	<i>Total</i>	
At 1 January 2015	3,589	–	3,589	
Net (reversal)/charge for the period	(589)	6,755	6,166	
At 31 December 2015	3,000	6,755	9,755	
Individual impairment	3,000	6,755	9,755	
Gross amount of loans, individually determined to be impaired, before deducting any individually assessed impairment allowance	8,103	6,755	14,858	

The following table provides an analysis of the customer loan portfolio, net of allowance for impairment, by types of collateral as at 31 December 2016 and 31 December 2015:

	<u>2016</u>		<u>2015</u>	
	<i>Loans net of allowance for impairment</i>	<i>Share in the total loans, %</i>	<i>Loans net of allowance for impairment</i>	<i>Share in the total loans, %</i>
State guarantees	75,845	28.2	18,249	11.0
Pledge of real property (mortgage) and title	25,811	9.6	35,896	21.6
Pledge of right of claim	22,970	8.5	18,492	11.2
Corporate guarantees	22,930	8.5	–	–
Pledge of equipment and goods in turnover	22,641	8.4	13,281	8.0
Pledge of shares	21,579	8.0	29,952	18.1
Pledge of vehicles	2,756	1.0	–	–
Uncollateralized part of the loans	74,504	27.8	49,872	30.1
Total loans to customers	269,036	100.0	165,742	100.0

*(Thousands of euros)***11. Loans to customers (continued)****Analysis of collateral for loans to customers**

The amounts shown in the table above represent the carrying amount of the customer loan portfolio, and do not necessarily represent the fair value of the collateral.

Concentration of loans to customers

As at 31 December 2016, loans to three borrowers (2015: two) with the total amount of loans to each of the two borrowers exceeding 10% of total loans to customers were recorded on the Bank's balance sheet. As at 31 December 2016, these loans comprised EUR 107,191 thousand (2015: EUR 40,991 thousand) in total and no impairment allowances (2015: no allowances) have been made for them.

Analysis of loans to customers by industry

The Bank issued loans to borrowers operating in the following industries:

	<u>2016</u>	<u>2015</u>
Leasing	85,897	44,114
Production and transmission of electricity	39,570	14,688
Food and beverage	27,504	7,569
Chemical production	23,831	22,743
Metal working industry	22,930	–
Manufacturing of electrical equipment	20,809	21,208
Construction	14,769	29,179
Agriculture	14,295	4,942
Transport	13,752	15,001
Crude oil refining	10,002	9,989
Production of pharmaceutical products	6,645	–
Trading	6,036	5,418
Other	308	646
	<u>286,348</u>	<u>175,497</u>
Less: allowance for loan impairment	(17,312)	(9,755)
Loans to customers	<u>269,036</u>	<u>165,742</u>

12. Investment property

In 2016 and 2015, the following changes occurred in the cost of property under operating lease:

	<u>2016</u>	<u>2015</u>
At 1 January	33,819	52,879
Additions	14,324	–
Inseparable improvements	50	33
Transfers in the property and equipment	(24,179)	(16,593)
Effect of revaluation	(2,174)	(2,500)
Carrying amount at 31 December	<u>21,840</u>	<u>33,819</u>

The Bank rents buildings under operating lease agreements. In 2016, the Bank's income from lease of investment property amounted to EUR 3,442 thousand (2015: EUR 5,214 thousand).

As at 31 December 2016, the fair value of investment property is determined based on the results of valuation performed on 31 December 2016. The valuation services were performed by an independent firm of professional appraisers which have acknowledged qualification and relevant professional experience in appraising real property of a similar category and in a similar location.

*(Thousands of euros)***12. Investment property (continued)**

The fair value is determined by reference to market-based evidence. For further details on the fair value of investment property refer to Note 24.

If the investment property was measured using the cost method, the carrying amounts as at 31 December 2016 and 31 December 2015 would be as follows:

	<u>2016</u>	<u>2015</u>
Cost	20,091	20,264
Additions	50	–
Accumulated depreciation	<u>(2,370)</u>	<u>(8,092)</u>
Net book value	<u>17,771</u>	<u>12,172</u>

The Bank has neither restrictions on the sale of its investment property nor contractual obligations to purchase, construct or develop investment properties, or to repair, maintain and enhance them.

(intentionally blank)

*(Thousands of euros)***13. Property, equipment and intangible assets**

The movements in property, equipment and intangible assets for the years 2016 and 2015 were as follows:

15. Due to banks and other financial institutions

Due to banks and other financial institutions are presented based on contractual terms and include the following items:

	<u>2016</u>	<u>2015</u>
Due to banks up to 1 year:		
Term deposits of banks and other financial institutions	52,856	49,238
Total due to banks up to 1 year:	<u>52,856</u>	<u>49,238</u>
Due to banks over 1 year:		
Repurchase agreements	66,069	64,756
Total due to banks over 1 year:	<u>66,069</u>	<u>64,756</u>
Total due to banks	<u>118,925</u>	<u>113,994</u>

The Bank performs daily monitoring of the repurchase agreements and the value of collateral when placing/returning additional collateral, if necessary.

Concentration of deposits from banks and other financial institutions

As at 31 December 2016, the Bank has two counterparties (31 December 2015: three counterparties) accounting for over 10% of the Bank's total deposits from banks and other financial institutions in the amount of EUR 111,418 thousand (31 December 2015: EUR 104,873 thousand).

16. Long-term loans of banks

Long-term loans of banks comprise:

	<u>2016</u>	<u>2015</u>
Syndicated loans	59,039	–
Loans of banks	14,310	44,187
Total long-term loans of banks	<u>73,349</u>	<u>44,187</u>

In June 2016, the Bank received a syndicated loan in the amount of EUR 60,000 thousand with a floating rate of EURIBOR (6 months) + 1.75% p. a. and maturing in May 2018.

*(Thousands of euros)***17. Debt securities issued**

Debt securities issued comprise:

	<i>Interest rate, % p.a.</i>	<i>Maturity</i>	<i>2016</i>	<i>2015</i>
RUB-denominated bonds	0.1-12.3	2024-2025	151,516	158,067
EUR-denominated bonds	3.5	2019	30,127	30,100
RON-denominated bonds	3.4-4.1	2018-2019	90,885	24,557
Total bonds			272,528	212,724

On 27 September 2016, the Bank issued bonds denominated in Romanian lei in the amount of RON 300 million (EUR 67,398 thousand) maturing in three years. The coupon rate on the bonds was set at 3.4% payable annually with the first coupon payment to be made on 27 September 2017.

Among other things, the Bank used the proceeds from the offerings to expand its loan portfolio.

At the dates of placement of RUB-denominated bonds, the Bank entered into cross-currency interest rate swaps for the purpose of managing currency risks (Note 7).

On 31 October 2016, the Bank offered to repurchase RUB-denominated bonds, series 02, and repurchased almost the total amount of those bonds RUB 2 998,0 thousand (EUR 43,327 thousand) from investors. A new coupon rate of 0.1% p.a. was set.

18. Equity**Subscribed and paid-in capital**

The Bank's subscribed capital amounts to EUR 1,300,000 thousand, which represents the Bank's equity stated in the Agreement on the Establishment of the International Investment Bank. The Bank's member countries make contributions to the Bank's equity pursuant to their shares stipulated in the Agreement.

As at 31 December 2016, the unpaid portion of the Bank's subscribed capital in the amount of EUR 986,947 thousand (31 December 2015: EUR 996,947 thousand) is the amount of contributions that have not been made yet by the Bank's member countries and the amount of unallocated equity contributions totaling EUR 175,500 thousand (31 December 2015: EUR 175,500 thousand).

On 9 March 2016, in accordance with the Memorandum of Understanding signed at the 102nd meeting of the IIB's Council (20-21 November 2014), the Government of Hungary contributed EUR 10,000 thousand to the Bank's equity. On 18 May 2015, the Government of Hungary contributed EUR 10,000 thousand to the Bank's equity to resume its full membership. In accordance with the Memorandum of Understanding signed at the 102nd meeting of the IIB's Council (20-21 November 2014), the Bank added EUR 10,000 thousand to the contribution of Hungary out of retained earnings for the previous years. On 29 July in accordance with the Memorandum of Understanding signed at the 102nd meeting of the IIB's Council (20-21 November 2014), the Bank fulfilled its obligations to transfer the second payment in the amount of EUR 10,000 thousand out of retained earnings for the previous years as Hungary's additional contribution to the Bank's share capital.

As a result, the paid-in capital of the International Investment Bank totaled EUR 313,053 thousand (31 December 2015: EUR 303,053 thousand).

(intentionally blank)

*(Thousands of euros)***18. Equity (continued)****Revaluation reserve for available-for-sale investment securities and revaluation reserve for property and equipment**

The movements in the revaluation reserve for available-for-sale investment securities and revaluation reserve for property and equipment were as follows:

	<i>Revaluation reserve for available-for-sale investment securities</i>	<i>Revaluation reserve for property and equipment</i>
At 1 January 2015	(999)	35,095
Net unrealized gains on available-for-sale investment securities	2,539	–
Realized gains on available-for-sale investment securities reclassified to the income statement	(3,204)	–
Revaluation of buildings	–	(3,642)
At 31 December 2015	(1,664)	31,453
Net unrealized gains on available-for-sale investment securities	10,673	–
Realized gains on available-for-sale investment securities reclassified to the income statement	(10,515)	–
Revaluation of buildings	–	(18,508)
At 31 December 2016	(1,506)	12,945

Revaluation reserve for available-for-sale investment securities

The revaluation reserve for available-for-sale investment securities records fair value changes of available-for-sale investments.

Revaluation reserve for property and equipment

The revaluation reserve for property and equipment is used to record increases in the fair value of buildings and decreases to the extent that such decrease relates to an increase on the same asset previously recognized in equity.

19. Contingencies and loan commitments**Legal**

In the ordinary course of business, the Bank is subject to legal actions and complaints. Management believes that the ultimate liability, if any, arising from such actions or complaints will not have a material adverse effect on the financial position or the results of future operations of the Bank. In accordance with the Agreement on the Establishment of the Bank, its assets (irrespective of their location) enjoy immunities from any administrative and legal claims.

The Bank takes all necessary legal and other actions to collect the bad debt and to realize respective repossession rights. When the estimated amount of costs resulting from the Bank's further actions to collect bad debt and/or realize respective repossession rights is higher than the amount collected and also when the Bank holds necessary and sufficient documents and/or regulations issued by the governmental authorities, it decides to write off such bad debt against the respective provision.

Insurance

The Bank obtained insurance coverage for a group of buildings, equipment and car park as well as liability insurance against damages caused by operating assets of a hazardous nature. However, the Bank did not obtain insurance coverage related to temporarily discontinued operations or the Bank's obligations to third parties.

*(Thousands of euros)***19. Contingencies and loan commitments (continued)****Commitments and contingencies**

At any time the Bank may have outstanding commitments to extend loans. These commitments take the form of approved loan agreements.

As at 31 December 2016, commitments and contingencies of the Bank comprised off-balance credit-related commitments, in particular undrawn loan facilities and reimbursement obligations.

Off-balance credit-related commitments are presented in the table below as at 31 December 2016 and 31 December 2015.

	<u>2016</u>	<u>2015</u>
Undrawn loan facilities	33,103	52,376
Reimbursement obligations	9,898	6,796
Guarantees issued	4,934	4,556
Total off-balance commitments	<u>47,935</u>	<u>63,728</u>

20. Leases**Bank as lessor**

The Bank provides its investment property for operating leases. As at 31 December 2016, the Bank's non-cancelable operating lease rentals amount to EUR 4,752 thousand (31 December 2015: EUR 5,938 thousand) and will be settled within 1-5 years.

21. Interest income and interest expense

Net interest income comprises:

	<u>2016</u>	<u>2015</u>
Loans to customers	13,886	8,022
Loans to banks	6,462	7,058
Available-for-sale investment securities	5,091	2,165
Held-to-maturity investment securities	2,975	5,944

23. Risk management**Risk management framework**

The Bank's risk management policy is based on the conservative assessment approach and is mainly aimed at mitigation of adverse impact of risks on the Bank's results, i.e. on the safety and reliability of fund allocation while maintaining the reasonable level of profitability. The conservative assessment approach assumes that the Bank does not enter into potential transactions with high or undeterminable risk level, regardless of profitability.

The Bank's risk management activities are intended to:

- ▶ Identify, analyze and manage risks faced by the Bank.
- ▶ Establish ratios and limits that restrict level of the appropriate types of risks.
- ▶ Monitor the level of the risk and its compliance with established limits.
- ▶ Develop and implement regulative and methodological documents as well as software applications that ensure the professional risk management for the bank transactions.

Risk management policies and procedures are reviewed regularly to reflect changing situation on the financial markets.

Integrated into the whole vertical organizational structure of the Bank and all areas of the Bank's activities, the risk management system makes it possible to identify in a timely manner and effectively manage different types of risks.

Risk management involves all of the Bank's divisions in evaluating, assuming, and controlling risks ("Three lines of defense"):

- ▶ Risk-taking (1st line of defense): the Bank's divisions directly preparing and conducting transactions, involved in the identification, assessment, and monitoring of risks and comply with internal regulations on risk management, as well as give due consideration to the risk level in the preparation of transactions
- ▶ Risk management (2nd line of defense): the division responsible for risk management develops risk management tools and methodology, assesses and monitors the risk level, prepares reports on risks, carries out risk aggregation, and calculates the amount of total capital requirements.
- ▶ Internal audit (3rd line of defense): independent quality assessment for existing risk management processes, identification of violations, and proposals for the improvement of the risk management system.

The Bank's operations are managed taking into account the level of the risk appetite approved by the Council of the Bank and its integration into a system of limits and restrictions insuring the acceptable level of risk for aggregated positions, transparent distribution of total risk limit among the activities of the Bank.

The Bank's Council, the Board, the Finance Committee, the Credit Committee and the Risk Management Department are responsible for managing the Bank's risks.

The Bank's Council is responsible for the general control over the risk management system, determines its development strategy and sets strategic limits and risk appetite.

(Thousands of euros)

23. Risk management (continued)

Risk management framework (continued)

The Board is the executive body of the Bank, which is responsible for compliance with risk management policies and procedures and exercises control over ratios, limits and risk appetite set by the Council. The Board ensures co-operation among all divisions and committees of the Bank.

Risk management system

The Finance Committee determines the Bank's approaches to forming the optimal structure of the Bank's balance sheet, taking into account information of current and expected level of risks associated with assets and liabilities management within the established limits and other restrictions. It also ensures management and control over the credit risk, market risk, operational risk, reputational risk, legal risk and liquidity risk and reviews the limit-setting offers.

The Credit Committee manages the Bank's loan portfolio in accordance with its effective lending policy, aligns operation of the Bank's divisions in terms of the credit risk management and reviews the offers for setting credit risk limits in respect of the certain counterparties.

Committees meet on a regular basis and provide to the Board their recommendations on how to perform transactions and improve risk management policies and procedures.

The Risk Management Department collects and analyzes information related to all types of bank risks, develops and implements risk management methodology, performs their qualitative and quantitative assessment, prepares recommendations for the Board and committees of the Bank to mitigate risk impact on the Bank's performance.

During 2016 further development of the risk management system started in 2013 was aimed at implementation of Basel standards and best practices of development banks within the Bank:

- ▶ New methodological and regulatory documents relating to credit and operational risk management have been elaborated.
- ▶ The Bank continued to implement the target model of the risk management system, based on requirements of the leading rating agencies.

In compliance with the existing procedures, twice a year the Bank sets and reviews limits for counterparties for the purpose of performing financial transactions and assessing their creditworthiness. As part of the lending activity analysis, the Bank continuously monitored the level of its loan assets risk. During the reporting period, the Bank sent its specialists to certain borrowers in order to monitor the implementation of the projects and identify potential primary evidence of impairment of loan assets.

To control and monitor the compliance with limits, the Bank performs daily monitoring of compliance with restrictions set in the list of the Bank's limits applied to transactions on money, currency and equity markets, as well as structural limits and stop-loss limits. In addition, the Bank's management receives regular reports on the status of risks within the Bank.

Risk appetite

The risk appetite is the aggregate amount of risk taken by the Bank to achieve its strategic goals and objectives. By approving the level of risk appetite, the Bank's Council determines the willingness to accept a risk or the amount of equity and liquidity that the Bank is willing to risk in the implementation of this strategy.

Risk appetite consists of 4 main components:

- ▶ The allocation of capital and liquidity (if necessary).
- ▶ Target allocation of capital across the main types of risk.
- ▶ The level of risk and target risk appetite in the context of the main performance indicators of the Bank and risks significant for the Bank.
- ▶ Determining levels of tolerance.

The procedure for determining the Bank's risk appetite shall be defined by the Credit Risk Management Department and submitted for review by the Board and approval by the Council of the Bank.

(Thousands of euros)

23. Risk management (continued)

Risk management system (continued)

The risk appetite shall be approved by the Council of the Bank on an annual basis for the next year and shall be a major factor of the Bank's strategic limits determining the thresholds for the Bank's key performance indicators and the Bank's significant risks.

In determining the risk appetite, the Bank assesses whether the specified risk appetite is acceptable in the current time period and whether it will be acceptable in the future, taking into account:

- ▶ Expectations of the founders concerning the level of profitability.
- ▶ International regulatory standards.
- ▶ Current and expected future volume of transactions.
- ▶ Current and expected future structure of significant risks.
- ▶ Current and expected future level of aggregate capital.

Based on the risk appetite determined by the Council, the Board annually approves the Bank's limits, sublimits, and risk indicators, which should not exceed the target values of the risk appetite.

Risk identification

The Bank identifies and manages both external and internal risk factors throughout its organizational structure. As a result of regular analysis of the Bank's exposure to different types of risks performed by the Risk Management Department, the Bank identifies factors leading to the increase of the risk level and determines the level of assurance over the current risk mitigation procedures. Apart from the standard credit and market risk analysis, the Risk Management Department monitors financial and non-financial risks influencing the results of banking transactions. Current risks exposures and their projected changes are discussed during the meetings of the Finance Committee and, if necessary, also communicated to the Board along with the recommendations on possible risk mitigation measures.

Risk assessment, management and control

The Bank's risk exposure is primarily reduced by means of collective decision-making. Strict allocation of responsibilities between divisions and officers of the Bank, precise description of instructions and procedures and assignment of competencies and powers to departments and their heads are also important risk mitigation factors. Appropriate methodologies are used to assess the risks. Instructions, procedures and methodologies are regularly reviewed and, if necessary, updated by the Bank in order to reflect changed market conditions and improve the risk management methodology.

The risk monitoring system comprises:

- ▶ Establishing limits to assume risks based on the respective risk assessment.
- ▶ Exercising control over the Bank's exposure by means of compliance with the established limits, regular assessment of the Bank's risk exposure and internal audit of risk management systems.

The Bank identifies the following major risks inherent in its various activities:

- ▶ Credit risk
- ▶ Liquidity risk
- ▶ Market risk
- ▶ Operational risk.

Credit risk

Credit risk is the risk that the Bank will incur a loss because its counterparty fails to discharge its contractual financial obligations to the Bank, or discharged them in an untimely fashion or not in full. Credit risk arises principally from loans and advances to customers and banks and other on and off balance sheet credit exposures. For risk reporting purposes, the Bank considers and consolidates all elements of potential credit risk exposures such as individual borrower or counterparty default risk.

(Thousands of euros)

23. Risk management (continued)

Credit risk (continued)

System of credit risk management

The Bank's regulatory documents establish the following:

- ▶ Procedures to review and approve loan/credit applications
- ▶ Methodology for the credit assessment of borrowers, counterparties, issuers and insurance companies
- ▶ Requirements to the credit documentation
- ▶ Procedures for the ongoing monitoring of loans and other credit exposures.

The Credit Committee establishes the limits per borrower/group of related borrowers. The Credit Committee structures the transaction to minimize credit risk. The Credit Department is responsible for ongoing control over the quality of the Bank's loan portfolio.

Upon preparation of a transaction by the initiating unit, it is reviewed by the Credit Committee, and then it is approved by the Board. The Board is responsible for all direct credit risk exposures in the amount of up to 15% of the Bank's share capital and for the period of up to 7 years. Direct credit risks exposures exceeding the specified amount or the period of 7 years should be approved by the Bank's Council.

The corporate loan/credit application and appropriate project documents are reviewed by the Customer Relations Department. Customer Relations Department takes a decision on the base of preliminary information on the deal whether to continue work with the client or not. In case of a positive decision, Credit Department makes full examination of the deal and sends the full set of required documents for reviewing the loan/credit application to Legal Department, Risk Management Department, Security Department, Strategic Development and Analysis Department, Internal Control Department, Compliance Control Department, Operational Department, Financial Department, Structured and Debt financing Department. These departments prepare expert opinions in the framework of their competence. The loan/credit application is subject to review by the Credit Committee based on the Credit Department's Description of the Investment Transaction and expert opinions received from the departments. The procedure of making lending decisions comprises the following steps: Step 1 includes reviewing application and making decision by the Credit Committee (if such issue falls within its competence); Step 2 includes making decision by the Board of the Bank (if such issue falls within its competence); Step 3 includes sending a set of respective documents approved by the Board of the Bank to the member country in order to obtain the final approval from the country of origin of the borrower or making decision by the Council of the Bank (if such issue falls within its competence).

Apart from individual customer analysis, the Risk Management Department assesses the whole loan portfolio with regard to credit concentration by industry.

To mitigate credit risk, the Bank limits concentrations of exposure to individual customers, counterparties and issuers, groups of related customers, counterparties and issuers as well as by industry and credit rating (for securities). Credit risk management process is based on regular analysis of the creditworthiness of the borrowers and their ability to repay interest and principal of debt, and on correspondent limits modification (if necessary).

The Bank continuously monitors the quality of individual credit exposures and regularly reassesses the creditworthiness of its customers. The revaluation is based on the customer's most recent financial statements, past-due status, performance of its business plan and other information submitted by the borrower, or otherwise obtained by the Bank. Based on this information, the borrower's internal credit rating (class of the loan) may be revised and, accordingly, the appropriate loan impairment provision may be created or changed.

Collateral and other credit enhancements

Credit risk is also managed by obtaining pledge of real estate, assets and securities, and other collateral, including corporate and personal guarantees, as well as monitoring availability and value of collateral.

(Thousands of euros)

23. Risk management (continued)

Credit risk (continued)

As availability of collateral is important to mitigate credit risk, this factor is a priority for the Bank when reviewing loan/credit applications if their terms and conditions are similar. To ensure recovery of its resources associated with conducting lending and project-financing transactions, the Bank applies the following types of collateral for recovery of loans and fulfillment of obligations:

- ▶ Pledge of equipment and goods in turnover
- ▶ Pledge of real estate (mortgage) and title
- ▶ Pledge of rights of demand and construction.

Quality of the collateral provided is assessed by the following criteria: safety, adequacy and liquidity. Collateral is not generally held over loans and deposits, except where securities are held as collateral in reverse repurchase agreements.

The Bank assumes that the fair value of the collateral is its value estimate recognized by the Bank to calculate the discounted impairment allowance based on its liquidity and possibility of selling such property in the event of borrower's default considering the time needed for such sale, litigation and other costs. Current market value of the collateral, if necessary, is assessed by accredited appraisers or based on the Bank's internal expert estimate, or carrying amount of the collateral including adjustment coefficient (discount). Where the market value of the collateral is assessed as impaired, the borrowers are usually required to provide additional collateral.

Portfolio of loans to banks and customers (less allowance for impairment) by type of collateral is analyzed in Notes 10 and 11.

Maximum exposure to credit risk

The maximum exposure to credit risk for the components of the separate statement of financial position, including derivatives, before the effect of mitigation through the use of master netting and collateral agreements, is best represented by their carrying amounts.

Where the financial instruments are recorded at fair value, their carrying amounts represent the current credit risk exposure but not the maximum credit risk exposure that could arise in the future as a result of changes in values.

Analysis of credit risk concentration by customers' industry is presented in Note 11.

Maximum credit risk exposure by credit related commitment represents the whole amount of these commitments (Note 19).

Derivative financial instruments

Credit risk arising from derivative financial instruments is, at any time, limited to those with positive fair values, as recorded in the separate statement of financial position.

Credit quality per class of financial assets

The assessment of credit quality of assets is based on the qualitative and quantitative assessment of credit risk.

Deposit contracts with banks and other financial institutions are concluded with counterparties with acceptable credit ratings assigned by such internationally recognized rating agencies as Standard & Poor's, Fitch and Moody's.

Assessment of credit quality of loans is based on a 5-grade system of risk factor categories: standard, sub-standard, doubtful, impaired and uncollectible. The risk factor category is assigned on the basis of the assessment of the customer's financial position, payment discipline, credit history, compliance with business plan and production discipline, additional characteristics such as management quality, compliance with other terms and conditions of the loan agreement, strength of positions in the market, competitive potential, administrative resources, industry specifics and country rating.

Where possible, the Bank seeks to restructure loans rather than to take possession of collateral. This may involve extending the payment arrangements and the agreement of new loan conditions. Once the terms have been renegotiated, the loan is no longer considered past due. Renegotiated loans are continuously reviewed to ensure that all criteria are met and that future payments are likely to occur. The loans continue to be subject to an individual impairment assessment, calculated using the loan's original effective interest rate.

Impairment assessment

The Bank creates allowance for impairment of loans that represents its estimate of losses incurred in its loan portfolio. The Bank writes off a loan balance against related allowances for impairment of loans only subject to the approval of the Council and where the loan is determined as uncollectible and when all necessary steps to collect the loan are completed. Such decision is made after consideration of the information on significant changes in the borrower's financial position such as inability to repay the loan, and when proceedings from disposal of the collateral are insufficient to cover the debt amount in full.

Individually assessed allowances

The Bank determines the allowances appropriate for each individually significant loan on an individual basis. Due to a limited number of borrowers, the Bank considers each loan as individually significant. Items considered when determining allowance amounts include the sustainability of the counterparty's business plan, its ability to improve performance once a financial difficulty has arisen, projected receipts and the expected dividend payout should bankruptcy ensue, the availability of financial support, the realizable value of collateral, and the timing of the expected cash flows. The impairment losses are evaluated at each reporting date, or more frequently, unless unforeseen circumstances require more careful attention.

The total amount of impairment allowance is approved by the Credit Committee on a monthly basis.

*(Thousands of euros)***23. Risk management (continued)****Liquidity risk**

Liquidity risk is the risk of loss resulting from the Bank's inability to meet its payment obligations in full when they fall due under normal and stress circumstances. Liquidity risk results from improper balance between the Bank's financial assets and financial liabilities by period and amount (including due to untimely discharge of its financial obligations by one or several counterparties of the Bank) and/or an unforeseen need of immediate and simultaneous discharge of its financial obligations.

Liquidity management is an integral part of general policy for the Bank's assets and liabilities management (ALM) and operates within the established limits and restrictions related to management of risks (liquidity, interest rate and currency risk) and the Bank's balance sheet items, and in accordance with the documents of strategic, tactical and operating planning.

Procedures for the Bank's liquidity position management, ensuring the Bank's ability to meet its obligations in full and on a timely basis and efficient resources management, are stipulated in the *Regulations for the IIB's Liquidity Position Management* that enables the development of the liquidity position management function provided for by the *IIB's Assets and Liabilities Management Policy*, as an integral part of general function of the Bank's management.

Decision making matrix related to liquidity management includes a strategic level of liquidity management (the Council), tactical level (the Board and special-purpose committees) and operational level (responsible structural divisions). Asset and Liability Management Department (DUAP or ALM Unit) became responsible for organizing and aligning management of the Bank's liquidity position. The Bank manages its liquidity position in accordance with planning horizons (up to 6 months) and possible scenarios of movements in liquidity position (stable, stressed).

Main instrument of liquidity position management under the stable scenario is a Plan of cash flows defining the cash flow by balance sheet products/instruments and taking into account the plan of future financial operations. The Bank determines the balance sheet gaps, payment schedule and need in financing of future operations based on the Plan of cash flows. As a result of application of these instruments, DUAP issues appropriate recommendations to responsible structural divisions.

The Bank has implemented a liquidity buffer to manage the Bank's liquidity under the stressed scenario. Application of the liquidity buffer enables the Bank to promptly monitor the sustainability and stability of the Bank's balance sheet structure in case of liquidity shortage that is critical to the Bank's solvency.

The liquidity buffer is formed primarily by liquidity reserves, namely securities recognized on the Bank's balance sheet and included in the Lombard lists of the European Central Bank and Bank of Russia. The Bank calculates its liquidity reserves as at the reporting date and for the next six monthly reporting dates (forecast). Liquidity buffer may be used to close the negative net position. As at 31 December 2016, the liquidity buffer amounts to EUR 75.9 mln (31 December 2015: EUR 65.1 mln).

The table below shows the contractual expiry by maturity of the Bank's off-balance credit-related commitments. Each undrawn loan commitment is included in the time band containing the earliest date it can be drawn down.

	<u>2016</u>	<u>2015</u>
Less than 1 month	33,213	52,376
1 to 3 months	3,650	178
3 months to 1 year	6,138	7,254
1 to 5 years	4,934	3,920
Off-balance credit-related commitments	<u>47,935</u>	<u>63,728</u>

(Thousands of euros)

23. Risk management (continued)**Liquidity risk (continued)**

The following table provides an analysis of assets and liabilities on the basis of the remaining period from the reporting date to the contractual maturity date. Quoted available-for-sale debt securities were included in "Less than 1 month" category as they are highly liquid investment securities, which the Bank may sell in the short term on the arm-length basis. Available-for-sale investment securities pledged under repurchase agreements are presented on the basis of periods from the reporting date to the expiry date of respective contractual obligations of the Bank.

Market risk

Market risk is the risk that the Bank may incur losses due to adverse fluctuations in market rate of financial instruments, interest rates, foreign exchanges, and securities' prices. Market risk includes equity risk on securities, interest rate risk and currency risk.

The Bank is exposed to market risk due to open positions in currency. Equity risk on securities arises from open positions in debt and equity instruments, which are exposed to general and specific market changes.

The Board of the Bank performs overall management of market risk.

The Finance Committee coordinates the Bank's market risk management policy, and reviews and provides recommendations on management of market risks to the Management Board.

The Treasury Department performs strategic management of market risks. The Risk Management Department performs the assessment of equity and currency risks exposure. The Treasury Department manages open positions within the established limits in order to increase the Bank's income on a daily basis.

*(Thousands of euros)***23. Risk management (continued)****Market risk (continued)***Currency risk and price risk*

Currency risk is the risk of loss resulting from adverse changes in exchange rates with respect to the Bank's open positions in foreign currencies. Price risk is the risk that the fair values of securities decrease as the result of changes in the levels of indices and the value of individual securities.

The Bank applies a VaR methodology to assess currency and equity risks. VaR is a method used in measuring maximum risk of the Bank, i.e. the level of losses on a certain position in relation to a financial instrument/currency/precious metals or a portfolio, which shall not be exceeded at a given confidence level and over a specified time horizon.

The Bank uses an assumption that the accuracy of assessment of maximum value at risk (confidence level) is 99%, and the time horizon is 10 days. The assessment of value at risk in relation to currency position of the Bank is carried out in major currencies and financial instruments of the Bank attributable to a securities portfolio.

At estimating value at risk, the Bank uses a parameter method, which allows assessing the volatility of yield on the basis of the most current market data.

The choice of a respective approach to value at risk estimation is made on the basis of data on statistical analysis of changes in fair values of financial instruments and exchange rates.

Selection period used by the Bank for modeling depends on types of instruments: 250 days for currency and securities. In order to monitor the accuracy of assessment of above mentioned risks, the Bank carries out regular testing (back-testing) based on historical data, which allows evaluating the compliance of risk assessment model with the actual market situation.

As at 31 December 2016 and 31 December 2015, final data on value at risk assessment (VaR) in relation to currency and price risks assumed by the Bank are represented as follows:

	<u>2016</u>	<u>2015</u>
Fixed income securities price risk	2,325	1,536
Currency risk	27	126

Despite the fact that measurement of value at risk is a standard industry method for risk assessment, this method has a number of limitations:

- ▶ Analysis based on value at risk assessment is correct in case current market conditions remain unchanged.
- ▶ Assessment of value at risk is sensitive to market liquidity in relation to a particular financial instrument, and the lack of liquidity may lead to biased volatility data.
- ▶ If a confidence level of 99% is used, losses exceeding the confidence range are not taken into account.
- ▶ 10-day time horizon implies the entire Bank's position over this period could have been closed or hedged. Results of value at risk assessment may be incorrect in case of market liquidity deterioration.

Fluctuations that may occur in the course of the day are not taken into account at calculating value at risk on the basis of the results of a business day.

(intentionally blank)

*(Thousands of euros)***23. Risk management (continued)****Market risk (continued)**

The Bank has assets and liabilities denominated in several foreign currencies. The financial position and cash flows of the Bank is exposed to the effects of fluctuations in the prevailing foreign currency exchange rates. Non-monetary financial instruments and financial instruments denominated in functional currency are not exposed to currency risk.

The Bank's exposure to currency risk as at 31 December 2016 and 31 December 2015 is presented below:

	2016					2015

23. Risk management (continued)**Market risk (continued)****Interest rate risk**

The Bank is exposed to the effects of fluctuations in the prevailing levels of market interest rates in its financial position and cash flows. Interest margins may increase as a result of such fluctuations but may also reduce or create losses in the event that unexpected movements arise.

The sensitivity of the separated income statement is the effect of the assumed changes in interest rates on net interest income for one year, based on financial assets and financial liabilities with floating rates. The sensitivity of equity is calculated by revaluing inactive traded available-for-sale financial assets with fixed rate as at 31 December 2016 for the effects of the assumed changes in interest rates based on the assumption that there are parallel shifts in the yield curve.

23. Risk management (continued)

Operational risk

Operational risk is a risk of loss arising from inadequate management and control procedures, fraud, inconsistent business solutions, system failures due to human errors and abuse of power, technical deficiencies, calculation errors, disasters and misuse of the Bank's property.

Generally, the Board controls the risk management process as well as compliance with internal policies, approves internal regulations relating to risk management, establishes operational risks monitoring limits and allocates duties relating to operational risk management among various agencies.

The Risk Management Department controls and monitors operational risks and provides respective reporting to the Board. The current control enables to timely identify and eliminate deficiencies in policies and procedures aimed at operational risk management, as well as to cut the possibility and amount of related losses. The Bank continuously seeks to enhance its business processes, operating structure and personnel incentives system in order to minimize the impact of operational risk.

24. Fair value measurements

Fair value is the amount at which a financial instrument could be exchanged in a current transaction between willing parties, other than in a forced sale or liquidation, and is best evidenced by a quoted market price.

The estimated fair values of financial instruments have been determined by the Bank using available market information, where it exists, and appropriate valuation methodologies. However, judgment is necessarily required to interpret market data to determine the estimated fair value. While management has used available market information in estimating the fair value of financial instruments, the market information may not be fully reflective of the value that could be realized in the current circumstances.

Fair value hierarchy

The Bank uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- ▶ Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities
- ▶ Level 2: techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly
- ▶ Level 3: techniques that use inputs which have a significant effect on the recognized fair value that are not based on observable market data.

*(Thousands of euros)***24. Fair value measurements (continued)****Fair value hierarchy (continued)**

For the purpose of fair value disclosures, the Bank has determined classes of assets and liabilities on the basis of their nature, characteristics and risks of the asset or liability, and the level of the fair value hierarchy.

	<i>Valuation date</i>	<i>Level 1 2016</i>	<i>Level 2 2016</i>	<i>Level 3 2016</i>	<i>Total 2016</i>

Fair value measurements

The Bank determines the policies and procedures for both recurring fair value measurement, such as unquoted derivatives, investment property and buildings, and for non-recurring measurement, such as inventories.

External appraisers are involved for valuation of significant assets, such as building and property. Involvement of external appraisers is decided upon by the Bank's Finance Department. Unquoted derivatives are measured by the Finance Department.

Selection criteria include market knowledge, reputation, independence and compliance with professional standards.

Methodologies and assumptions

The following describes the methodologies and assumptions used to determine fair values of those financial instruments that are not recorded at fair value in these separate financial statements.

Assets for which fair value approximates their carrying amount

For financial assets and financial liabilities that are liquid or have a short-term maturity (less than three months) it is assumed that the carrying amounts approximate their fair value.

Cash and cash equivalents, deposits with banks and other financial institutions

Management has estimated that as at 31 December 2016 and 31 December 2015 the fair value of deposits with banks and other financial institutions, and cash and cash equivalents was not significantly different from their respective carrying amount. This is due to the existing practice of renegotiating interest rates to reflect current market conditions, and, therefore, a majority of balances carries interest at rates approximating market interest rates.

(intentionally blank)

(Thousands of euros)

24. Fair value measurements (continued)

Methodologies and assumptions (continued)

Financial instruments with fixed and floating rate

The fair value of instruments with floating interest rates is approximately equal to their carrying amount. In case of significant changes of the market situation the interest rates on loans to customers and banks, and long-term loans of banks at a fixed interest rate may be revised. Consequently the interest rates on the financial instruments issued or received shortly before the balance sheet date are not significantly different from the current interest rates for new instruments with similar credit risk and a similar maturity. If the Bank determines that the rates for loans issued or borrowings are significantly different from the current market rates, the Bank determines the fair value of such loans issued and borrowings. The valuation is based on discounted cash flow method using current market interest rates for the financial instruments with similar credit risk and similar maturity. The discount rates depend on the currency, the maturity of the instrument and the credit risk of the counterparty. The Bank determines that the fair value of due to banks and other financial institutions and long-term loans of banks did not differ significantly from their carrying amounts as at 31 December 2016 and 31 December 2015.

Investment property

The Bank engages an independent appraiser for the investment property fair value measurement. As at the valuation date (31 December 2016), the fair values of investment property were based on the results of valuation performed by an accredited independent appraiser and the prices of market transactions using the market, cost and income approaches to fair value measurement.

The duration of the cash flows and the specific timing of inflows and outflows are determined by events such as rent reviews, lease renewal and related re-letting, redevelopment, or refurbishment. The appropriate duration is typically driven by market behavior that is a characteristic of the class of real property. Periodic cash flow is typically estimated as gross income less vacancy, non-recoverable expenses, collection losses, lease incentives, maintenance cost, agent and commission costs and other operating and management expenses. The series of periodic net operating income, along with an estimate of the terminal value anticipated at the end of the projection period, is then discounted.

Property and equipment – buildings

Fair value of the properties was determined using the market approach. This means that valuations performed by the appraiser are based on market transaction prices, significantly adjusted for difference in the nature, location or condition of the specific property. As at the valuation date (31 December 2016), the properties' fair values are based on valuations performed by an accredited independent appraiser and the prices of market transactions using the market, cost and income approaches to fair value measurement.

Significant unobservable inputs in determining the fair value of real estate properties

As at the valuation date (31 December 2016), the significant unobservable inputs used in determining the fair value of real estate properties included the average asking prices for sale of similar properties ranging from EUR 3,094 per sq. m (range minimum) to EUR 4,186 per sq. m (range maximum), and lease rates ranging from EUR 371 per sq. m. a year (minimum) to EUR 407 per sq. m. a year (maximum).

There were no transfers of financial instruments between level 1 and level 2 in 2016 and 2015.

(Thousands of euros)

Net position	5,296	452	3,491	22,227	31,466

Securities sold under repurchase agreements are transferred to a third party and the Bank receives cash in exchange. If the securities increase or decrease in value, the Bank may, in certain circumstances, require, or be required, to pay additional collateral in the form of cash and/or other securities. The Bank has determined that it retains substantially all the risks and rewards of these securities, which include credit risk, market risk, country risk and operational risk, and therefore has not derecognized them. In addition, it recognizes a financial liability for cash received.

The fair value of investment securities available for sale sold under repurchase agreements is equal to their carrying amount (Note 24).

*(Thousands of euros)***25. Transferred financial assets that are not derecognized (continued)**

The related liabilities, which are recorded against the cash received for such transactions, are presented in amounts due to banks and other financial institutions in the separate statement of financial position as at 31 December 2016 (as at 31 December 2015: in amounts due to banks and other financial institutions).

26. Segment information

For management purposes, the Bank identifies the following three operating segments based on its lines of services:

Credit investment activity	Investment banking services, including long-term corporate and interbank financing
Treasury	Operations in financial markets, transactions with securities, derivative financial instruments and foreign currency, and liquidity management
Other operations	Operational leasing services, other operations

Management monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance, as explained in the table below, is measured differently from profit or loss in the separate financial statements. The following table presents revenue, income, assets and liabilities of the Bank's operating segments:

2016	<i>Credit investment activity</i>	<i>Treasury</i>	<i>Other operations</i>	<i>Total</i>
Income				
<i>External customers</i>				
Interest income	20,348	12,093	9	32,450
Net gains from trading in foreign currencies and operations with derivatives	–	9,068	–	9,068
Net gains from revaluation of derivative financial instruments	–	36,679	–	36,679
Net gains from available-for-sale investment securities	–	10,515	–	10,515
Net gains from held-to-maturity investment securities	–	616	–	616
Reversal of allowance for loan impairment	–	–	89	89
Income from lease of investment property	–	–	3,442	3,442
Reversal of allowance for impairment of other assets	–	–	67	67
Other segment income	241	–	430	671
Total income	20,589	68,971	4,037	93,597
Interest expenses	(11,250)	(16,402)	–	(27,652)

(Thousands of euros)

26. Segment information (continued)

The Bank's management separates the "Development portfolio" assets allocated within operating segments. The criteria of separation is orientation of the assets on the fulfilling of the Bank's mission. "Development portfolio" includes loans to banks and loans to customers excluding impaired loan projects and the investments in debt securities purchased upon initial placement by the issuer.

Financial liabilities						
Repurchase agreements with banks	64,756	–	64,756	(64,756)	–	–
Total	64,756	–	64,756	(64,756)	–	–

28. Related party disclosures

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions as defined by IAS 24 *Related Party Disclosures*. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form.

Transactions and settlements with related parties were carried out on conditions similar to those that prevail in transactions between independent parties.

(Thousands of euros)

28. Related party disclosures (continued)

The volumes of related party transactions, outstanding balances at the year end, and related expenses and income for 2016 and 2015 are as follows:

		<i>31 December 2016</i>	<i>31 December 2015</i>
	<i>Related party</i>	<i>Carrying amount</i>	<i>Carrying amount</i>
Separate statement of financial position			
Due to banks and other financial institutions	Subsidiary	–	621
Current customer accounts	Key management personnel	1,783	1,897
Other non-financial liabilities	Key management personnel	416	493
Other financial liabilities	Subsidiary	320	158
		2016	2015
	<i>Related party</i>	<i>Income/ (expense)</i>	<i>Income/ (expense)</i>

Compensation for travel expenses and medical insurance	Key management personnel	(55)	(89)
Professional services	Subsidiary	(177)	(341)
Operating expenses		(1,598)	(1,954)
Net (loss)/profit for the year		(1,659)	(2,136)

29. Capital adequacy

Capital adequacy ratio is the most important financial indicator characterizing credibility of credit institutions and is estimated as ratio of capital base to risk-weighted assets expressed as a percentage. Approval of the capital adequacy ratio is the sole power of the Bank's Council.

The Basel Committee on Banking Supervision recommends maintaining the ratio of capital to risk-weighted assets ("capital adequacy ratio") above the prescribed minimum level. As at 31 December 2016, this minimum level was 8% (2015: 8%).

Besides, taking into account the Bank's status as the multilateral development institution and the structure of the Bank's member countries and respective decision of the Council, the capital adequacy ratio was set for the Bank at the level of not less than 25% as at 31 December 2016 (2015: 25%).

*(Thousands of euros)***29. Capital adequacy (continued)**

The following table shows the composition of the Bank's capital position computed in accordance with the Basel Accord (Basel II) as at 31 December 2016 and 31 December 2015.

	<u>2016</u>	<u>2015</u>
Capital		
Tier 1 capital	377,719	365,224
Tier 2 capital	11,439	29,789
Total regulatory capital	<u>389,158</u>	<u>395,013</u>
Risk-weighted assets		
Credit risk	482,246	560,010
Market risk	186,588	70,461
Operational risk	50,683	48,696
Total risk-weighted assets	<u><u>719,517</u></u>	<u><u>679,167</u></u>
Total capital expressed as a percentage of risk-weighted assets, % ("capital adequacy ratio")	54.09%	58.16%
Total tier 1 capital expressed as a percentage of risk-weighted assets, % ("tier 1-capital adequacy ratio")	52.50%	53.78%

(The end)
